CCI OFFICIAL EXAMINATION QUALIFICATION AND ADMISSION TO THE EXAMINATION
(TRACK 1)
High School Diploma/General Education Diploma (GED)

Student Acknowledgement

All CURE students that meet the Center for Ultrasound Research and Education graduation requirements are eligible to apply to sit for a credentialing examination administered by the registry specific to the highest level of education attained.

A graduate of CURE who possesses a High School Diploma or who has earned a General Education Diploma or GED as the highest level of education obtained, and who has fulfilled 800 externship clinical hours in the relevant specialty (Cardiac or Vascular), qualifies to sit for the Cardiac Credentialing International (CCI) Registered Cardiac Sonographer (RCS) or Registered Vascular Specialist (RVS) specialty examinations upon graduation under prerequisite RCS5 or RVS5 (see attached).

IMPORTANT NOTE: The specialty will need to be chosen prior to being placed at an externship site to ensure CCI's clinical requirements are met.

Additionally, after successfully passing the CCI Vascular or Cardiac registry exam, students qualify to sit for ARDMS specialty exams under ARDMS prerequisite 5 which also requires a passing score on the **Sonography Principles & Instrumentation** (SPI) exam. Students who successfully pass CURE's Ultrasound Physics course with a grade of "C" (2.0) or better, qualify to take the SPI examination while they are in the program.

By signing below, enrolling students understand that scheduling exams and all fees associated with registry applications and examinations are the sole responsibility of the student. Individual registry requirements are subject to change by each individual credentialing organization at their discretion. CURE will make sure students receive the most up to date information regarding the registry requirements related to their specified registry pathway.

I _____ have received disclosure materials

related to the pathway I must take in order to sit for the CCI registry examination that is based on my highest level of education which is a High school Diploma or GED. I understand that while in school, I will learn several modalities in the DMS, VT, E program but understand that I will be placed at an externship site specifically to achieve CCI's minimum requirements regarding clinical hours in either Vascular or Cardiac.
