CCI OFFICIAL EXAMINATION QUALIFICATION AND ADMISSION TO THE EXAMINATION
(TRACK 3)
Bachelor Degree
Student Acknowledgement

All CURE students that meet the Center for Ultrasound Research and Education graduation requirements are eligible to apply to sit for a credentialing examination administered by the registry specific to the highest level of education attained.

A graduate of CURE who possesses a Bachelor Degree or a higher, immediately qualify for the American Registry of Diagnostic Medical Sonography (ARDMS) under prerequisite 3.

ARDMS requires applicants to pass their SPI physics examination prior to applying to take one of the specialty exams offered. Students qualify to sit for ARDMS specialty exams under ARDMS prerequisite 5 which also requires a passing score on the Sonography Principles & Instrumentation (SPI) exam. Students who successfully pass CURE's Ultrasound Physics course with a grade of "C" (2.0) or better, qualify to take the SPI examination while they are in the program.

Other options on Track #3:
An Associate Degree or higher qualifies CURE graduates for American Registry of Radiologic Technologists (ARRT) General Sonography Exam. Students must apply for the ARRT specialty examination of their choice within 3 years of graduation. ARRT will not accept applications from students who graduated more than 3 years prior to applying. Should the maximum time lapse, students will no longer qualify for this track and must pursue other registry examination options.

Students who fulfill 800 externship hours in their relevant specialty during the program, immediately qualify to sit for the Cardiac Credentialing International (CCI) Registered Cardiac Sonographer (RCS) or Registered Vascular Specialist (RVS) specialty examinations upon graduation. The specialty will need to be chosen prior to being placed in any externship site(s) to ensure you meet the clinical requirements required by CCI.

In signing below, enrolling students understand that scheduling exams and all fees associated with registry applications and examinations are the sole responsibility of the student. Individual registry requirements are subject to change by each individual credentialing organization at their discretion. CURE will make sure students receive the most up to date information regarding the registry requirements related to their specified registry pathway.

I _____ have received disclosure materials related to the pathway I must take in order to sit for the ARRT or CCI registry examination that is based on my highest level of education which is An Associate Degree. I understand that while in school, I will learn several modalities in the DMS, VT, E program but understand that I will be placed at an externship site specifically to achieve ARRT's or CCI's minimum requirements regarding clinical hours in either Vascular or Cardiac.
