Aorta & IVC Protocol

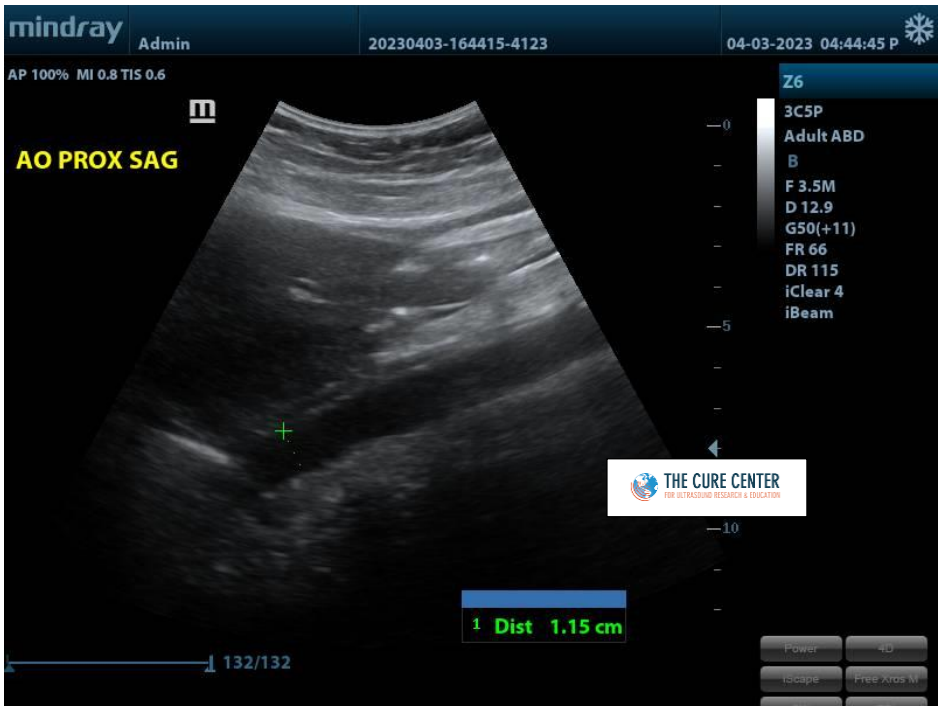

- Aorta
- Rt. & Lt. CO. ILIAC
- IVC
- CA & SMA

Sagittal AORTA

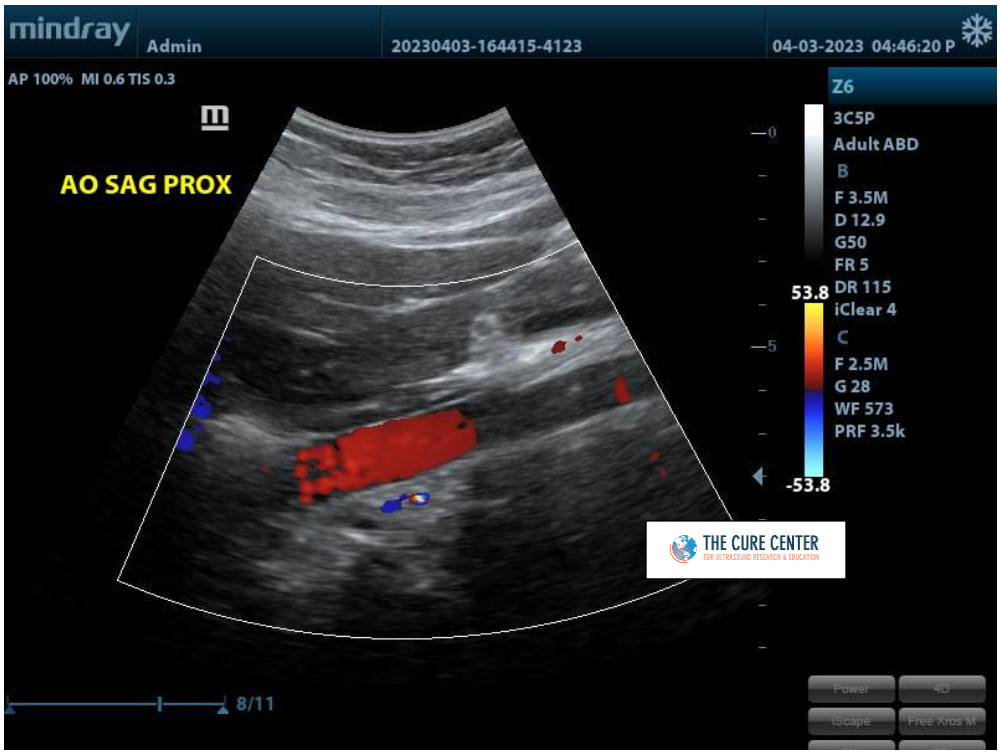

1. SAG AO: Proximal Grayscale

2. SAG AO: Proximal w/ Measurement

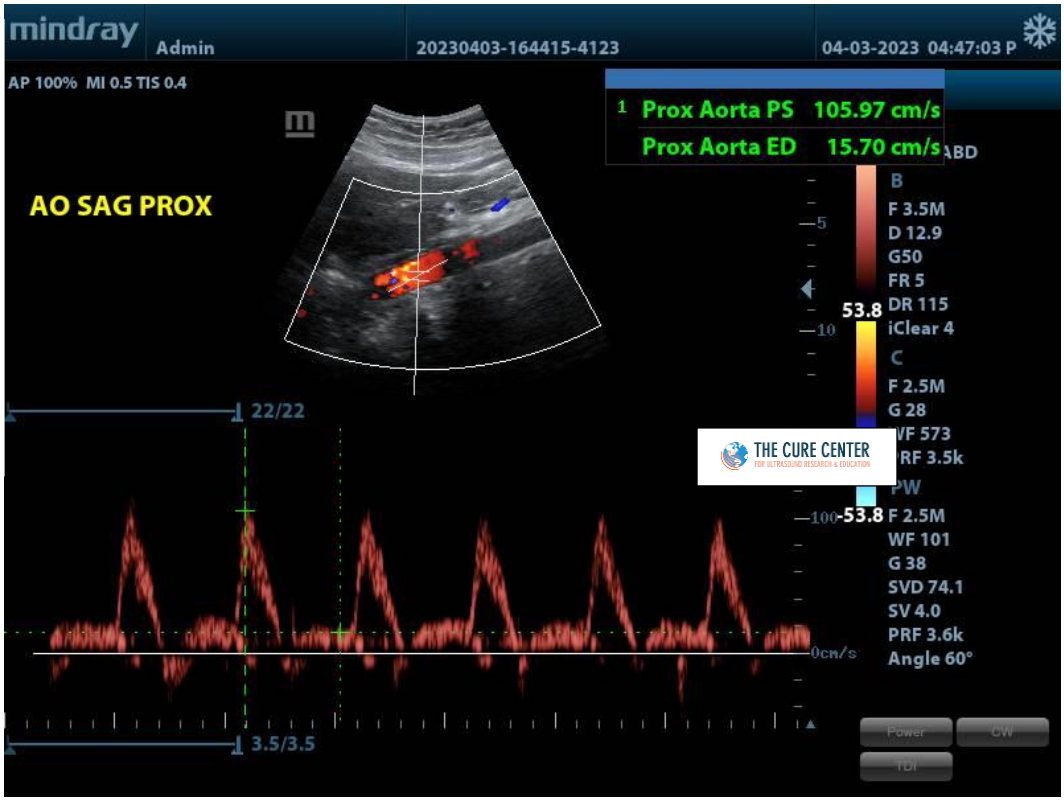

3. SAG AO: Proximal w/ Color

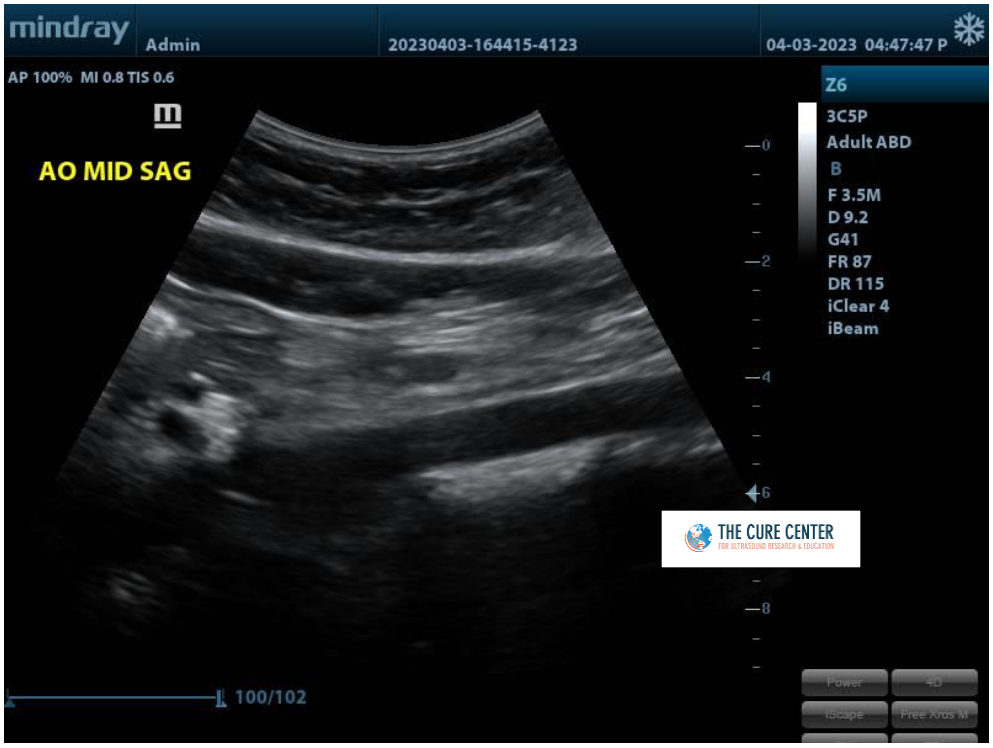

4. SAG AO: Proximal w/ Doppler PSV/ EDV Measurement

NOTE: Be sure to **angle** your sample gate to **<u>60 degrees</u>** for spectral Doppler images.

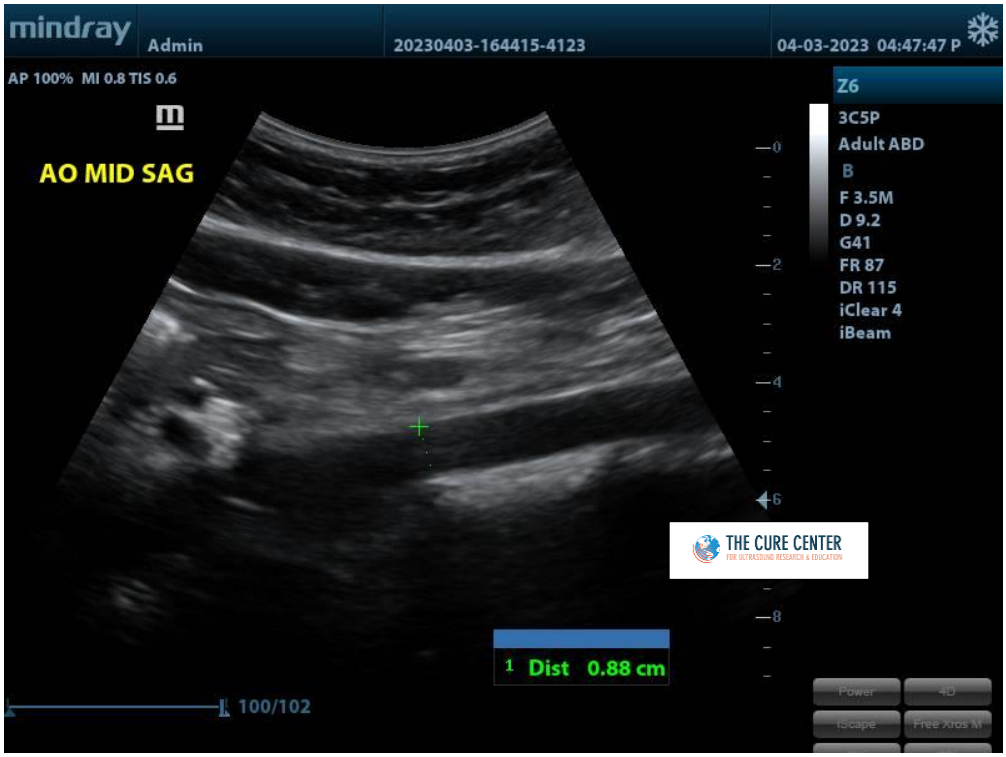

Remember to obtain measurements of the **PSV** and E**DV**, respectively.

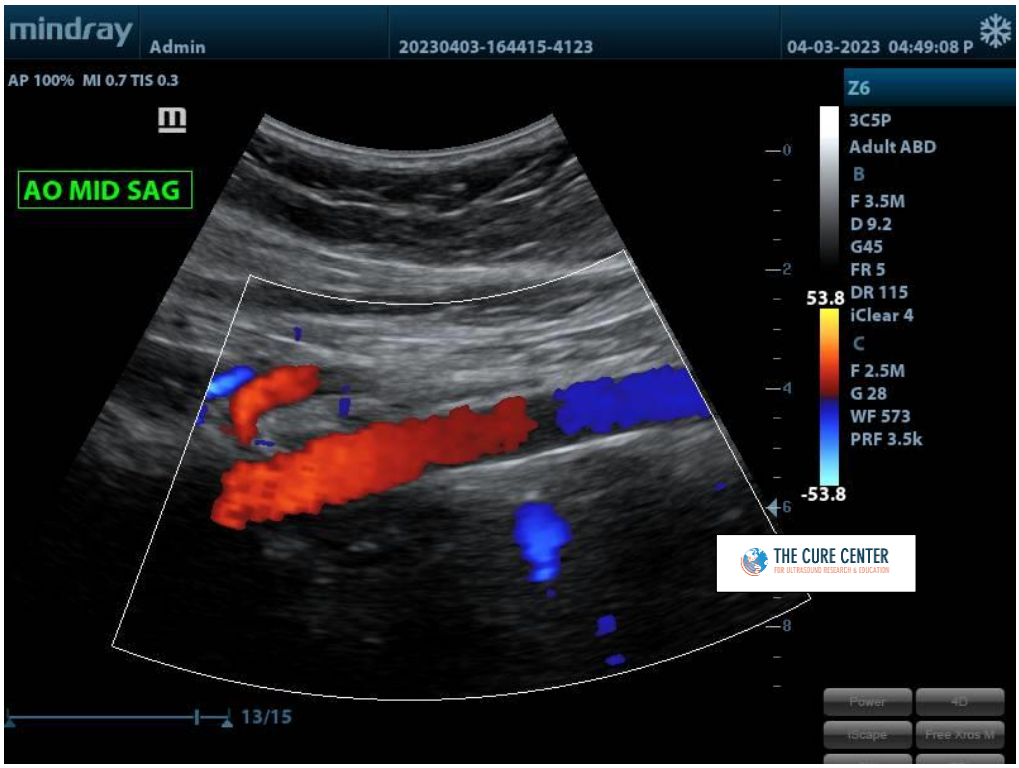

5. SAG AO: Mid Grayscale

6. SAG AO: Mid Grayscale w/ Measurement

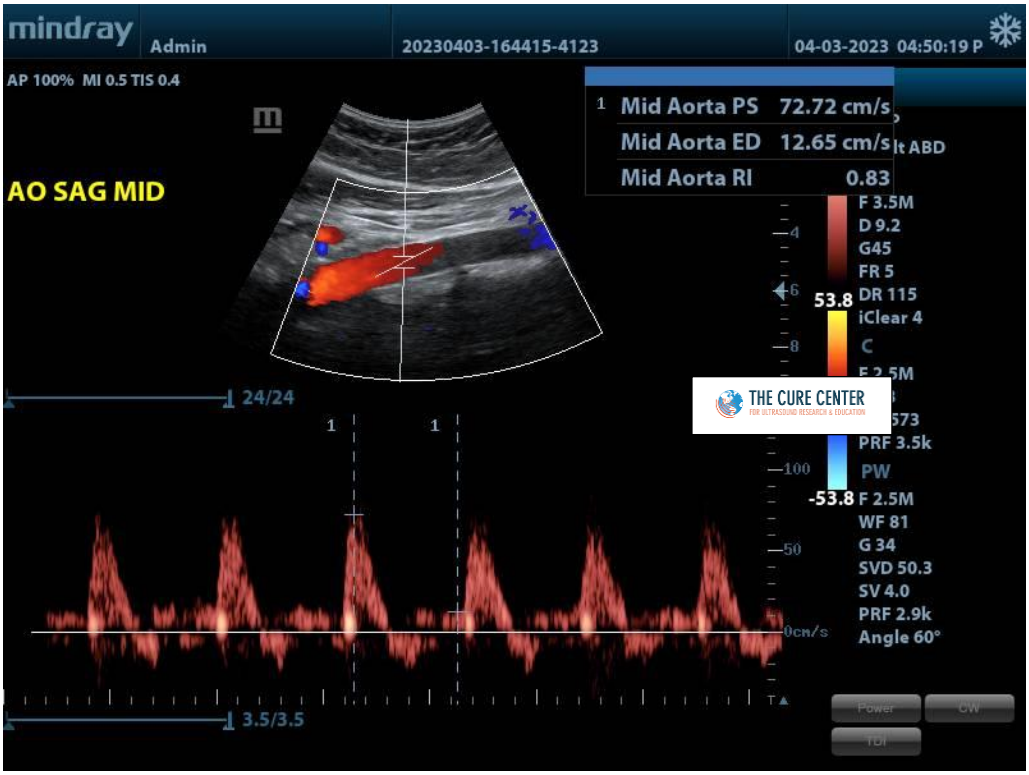

7. SAG AO: Mid w/ Color

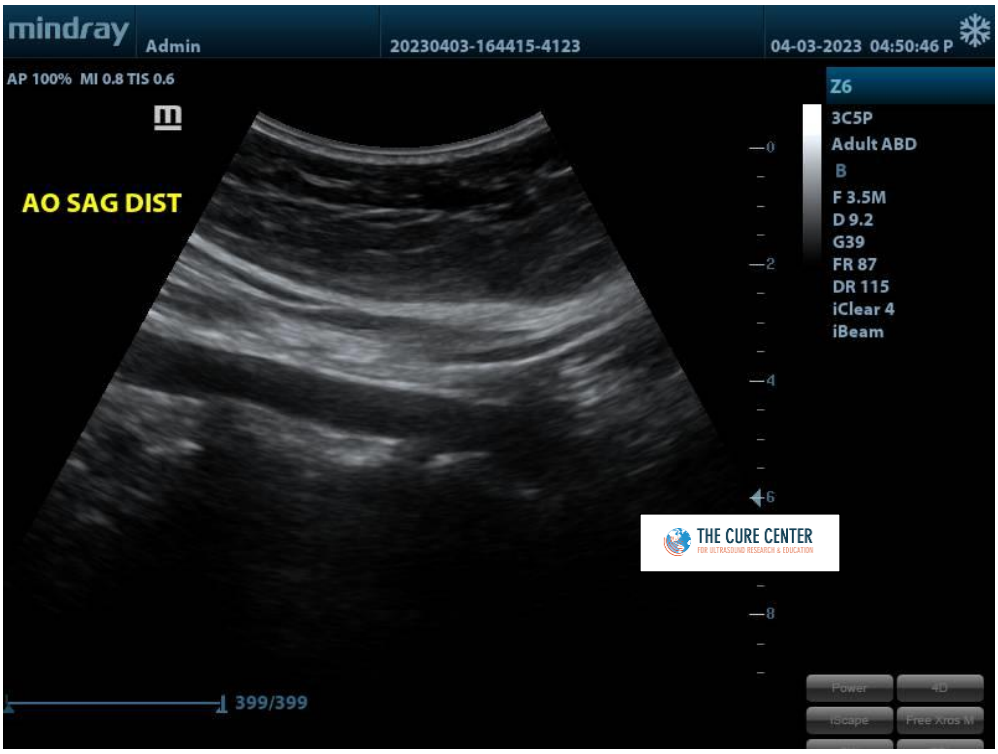

8. SAG AO: Mid w/ Doppler PSV/ EDV Measurement

NOTE: Be sure to **angle** your sample gate to **<u>60 degrees</u>** for spectral Doppler images.

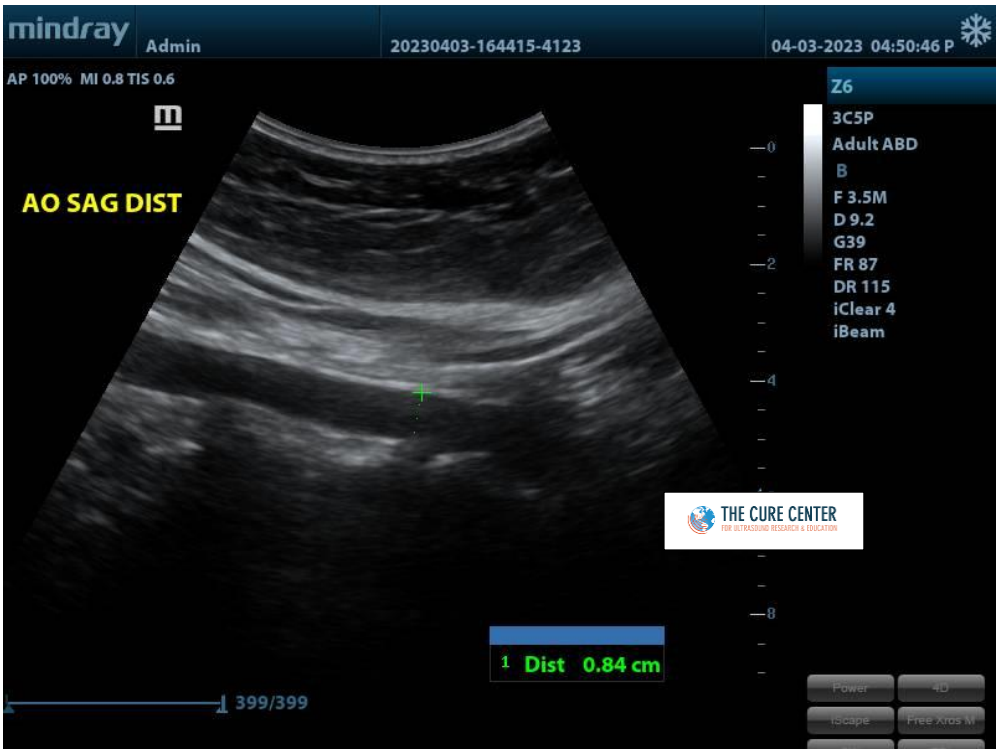

Remember to obtain measurements of the **PSV** and E**DV**, respectively.

9. SAG AO: Distal Grayscale

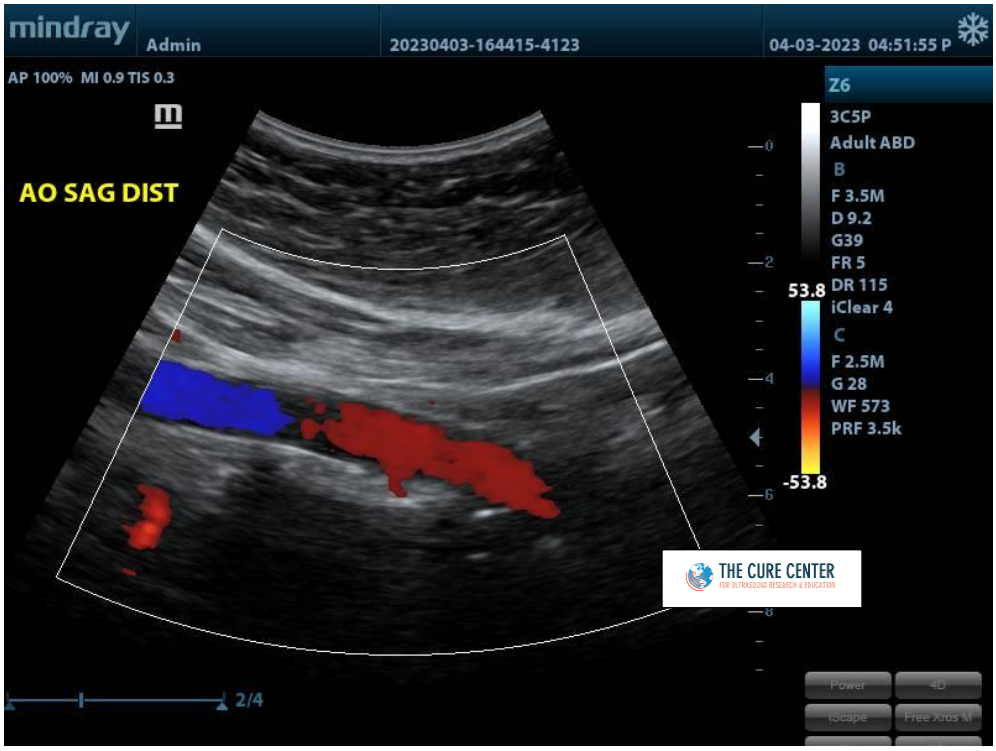

10. SAG AO: Grayscale w/ Measurement

11. SAG AO: Distal w/ Color

NOTE: Remember to invert your color scale from this point on.

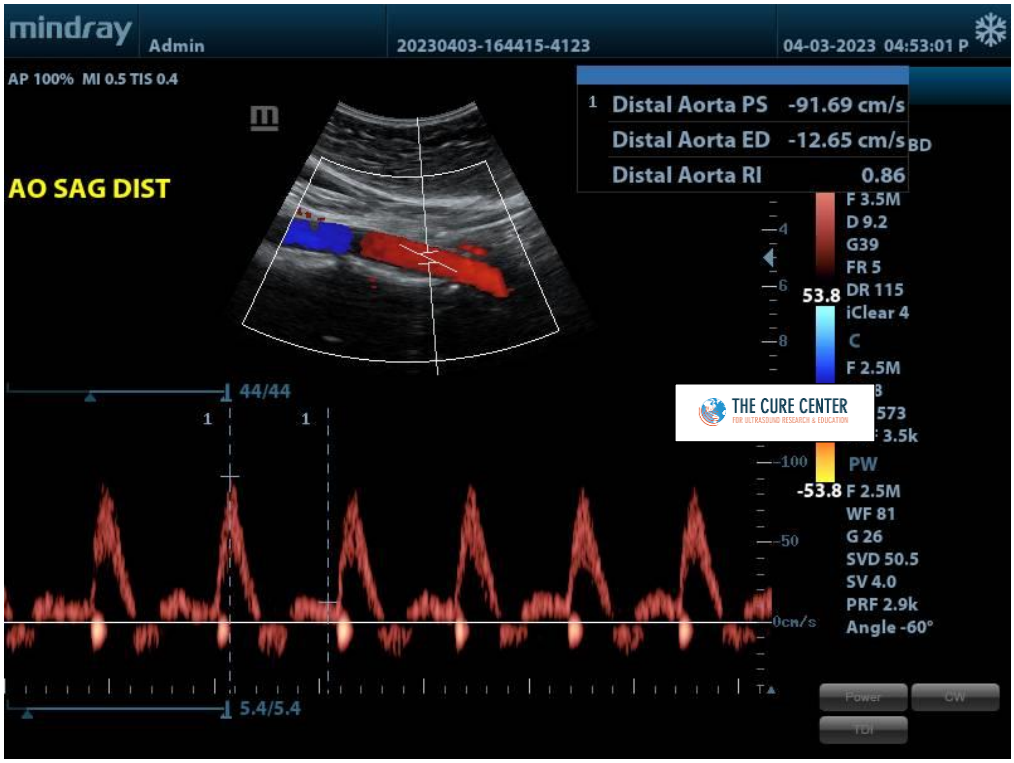

Blue should be on top and red at the bottom.

12. SAG AO: Distal w/ Doppler PSV/ EDV Measurement

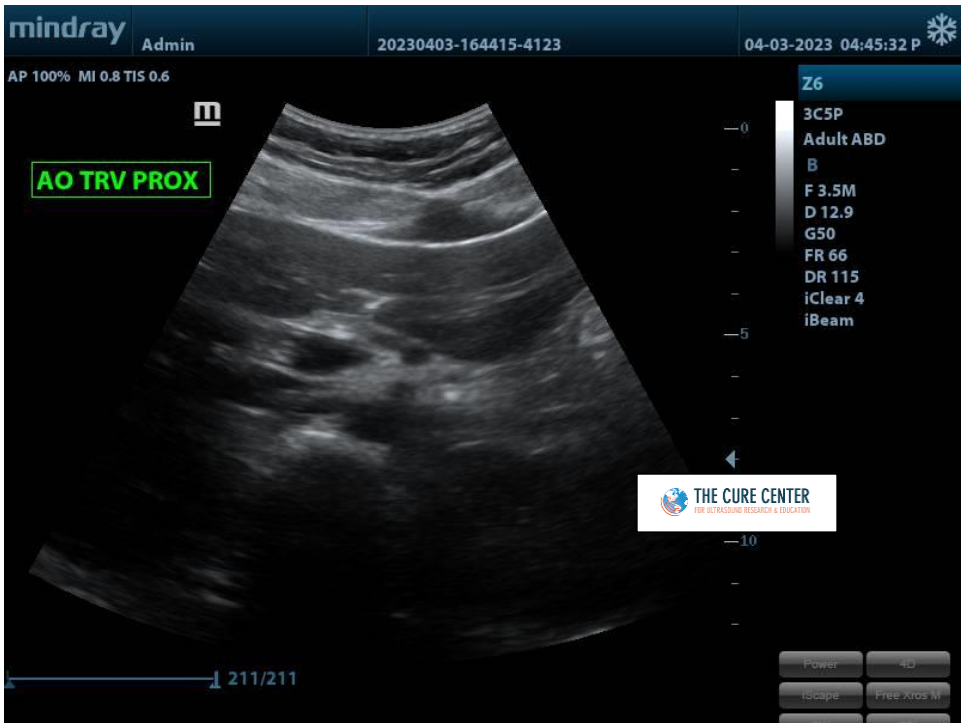

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

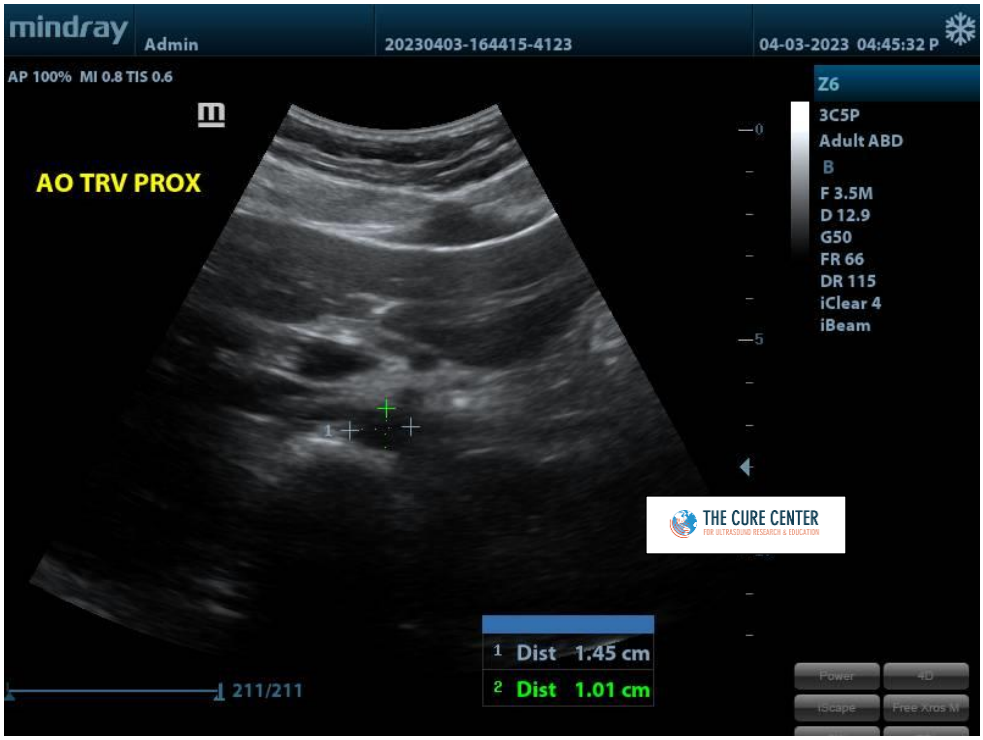

Transverse AORTA

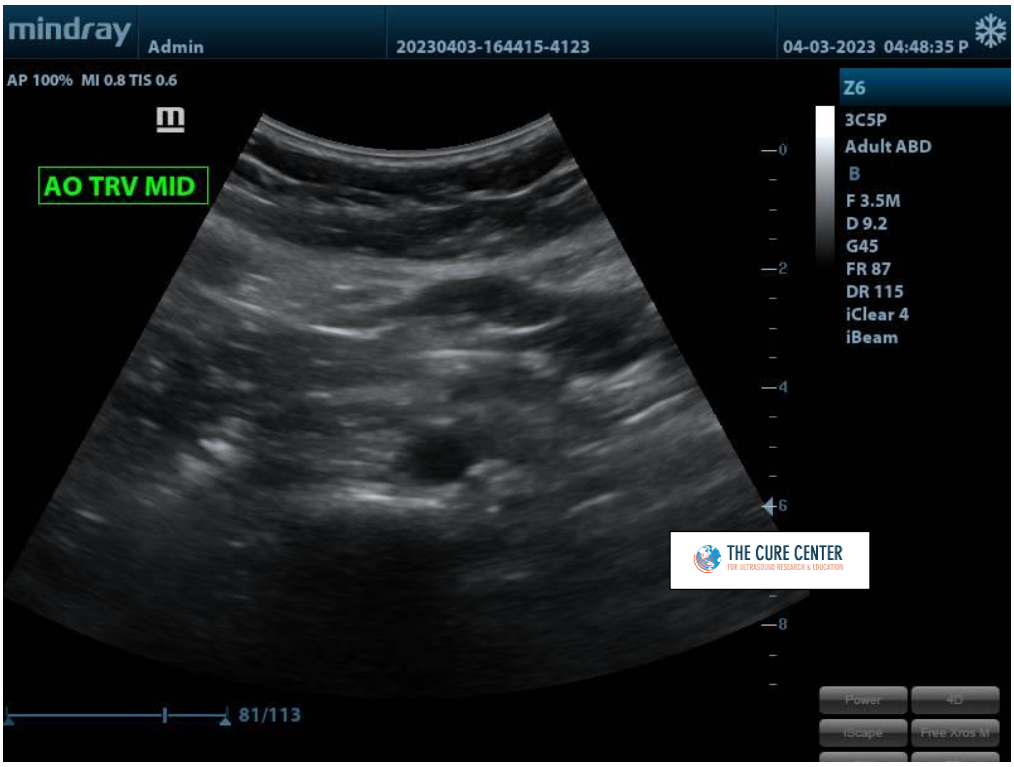

13. TRV AO: Proximal Grayscale

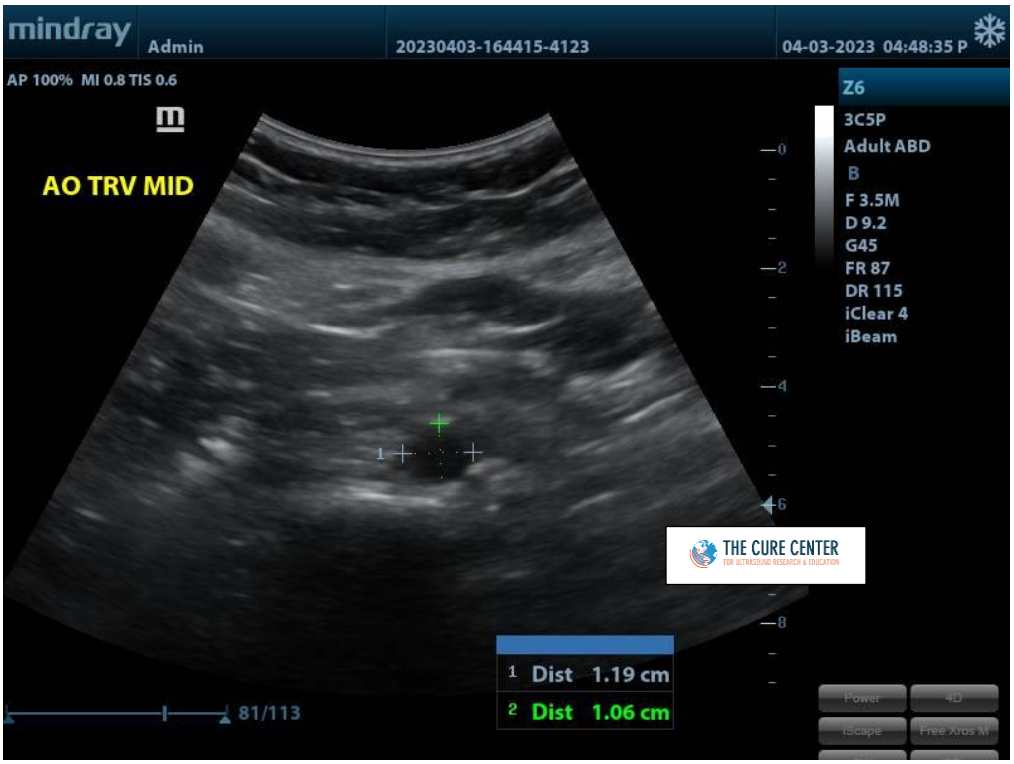

14. TRV AO: Proximal w/ Measurement

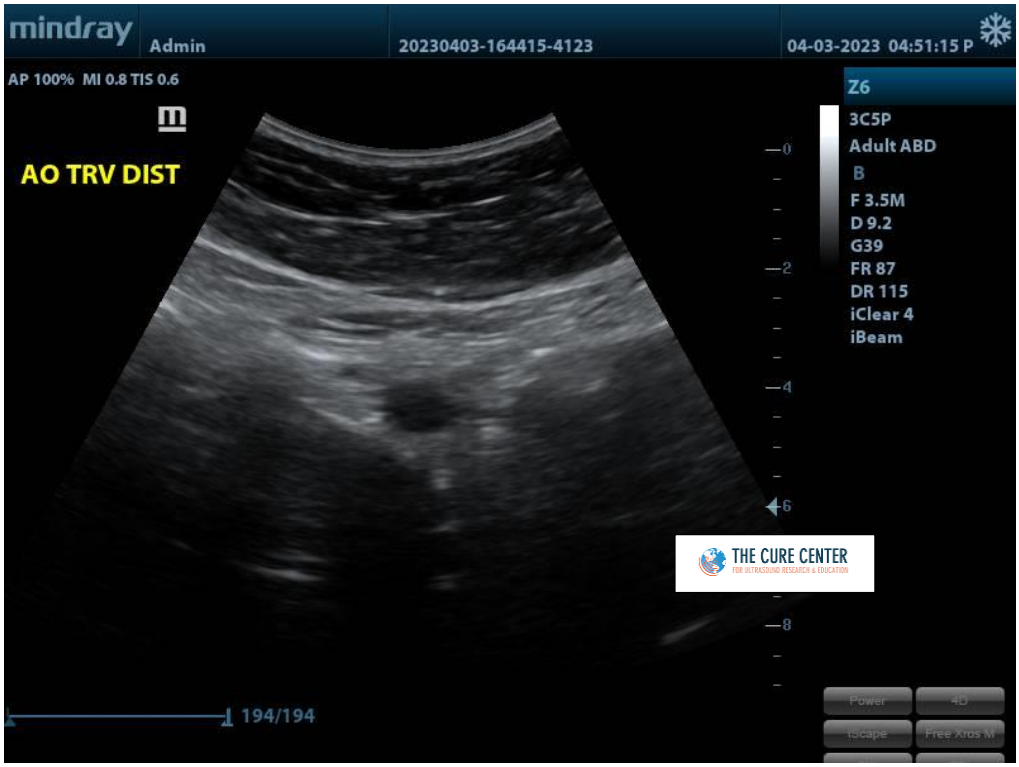

15. TRV AO: Mid Grayscale

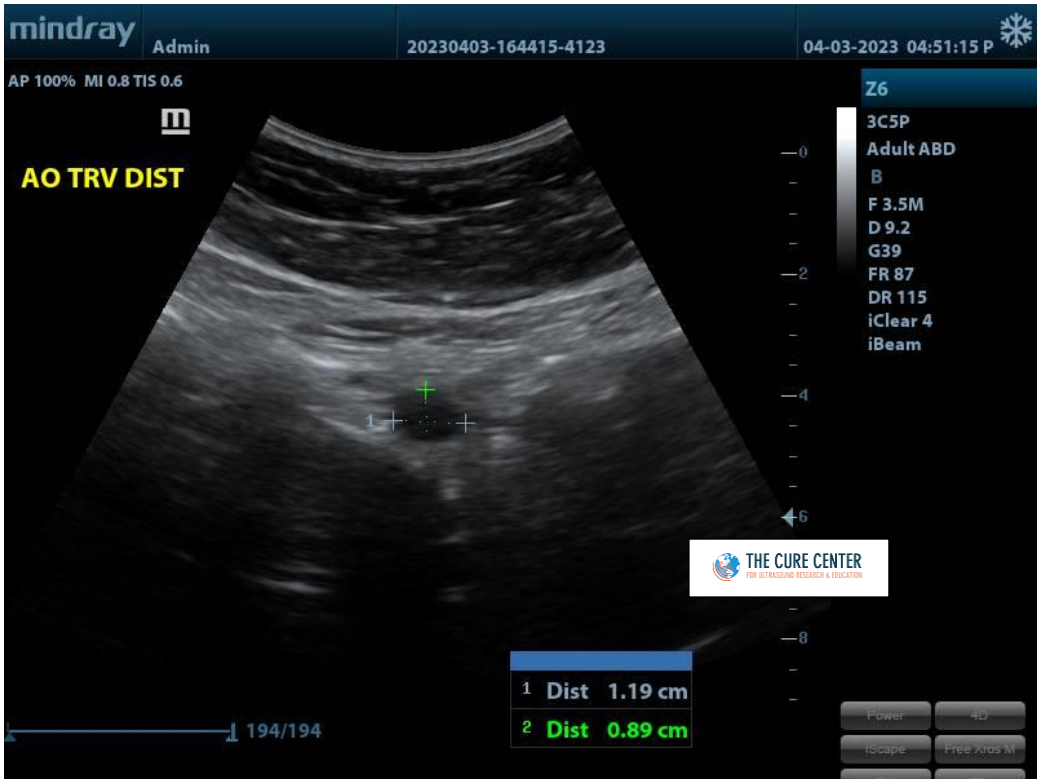

16. TRV AO: Mid w/ Measurement

17. TRV AO: Distal Grayscale

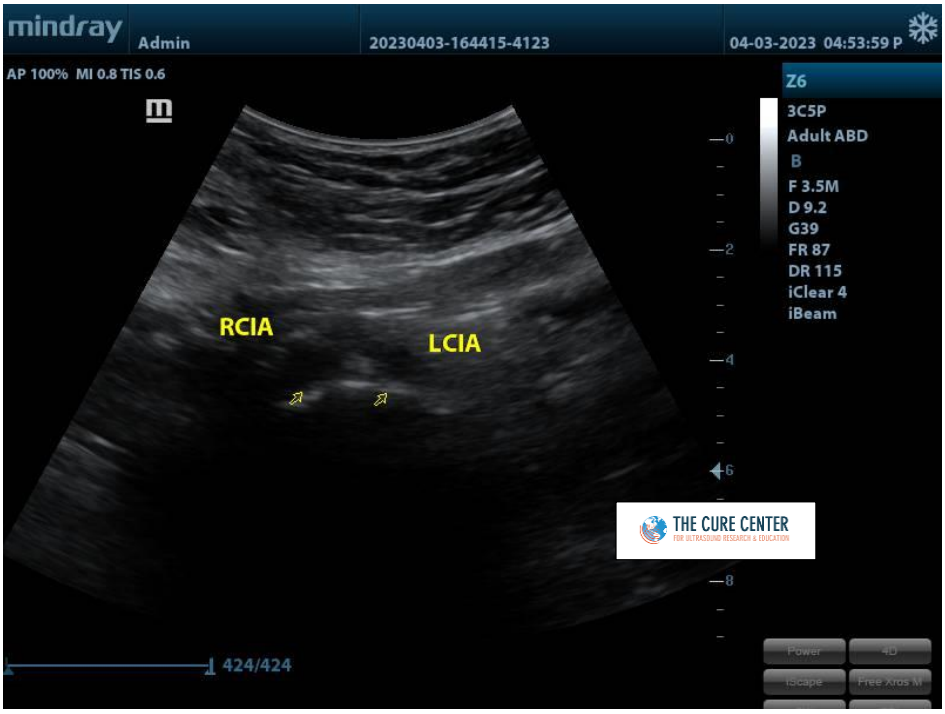

18. TRV AO: Distal w/ Measurement

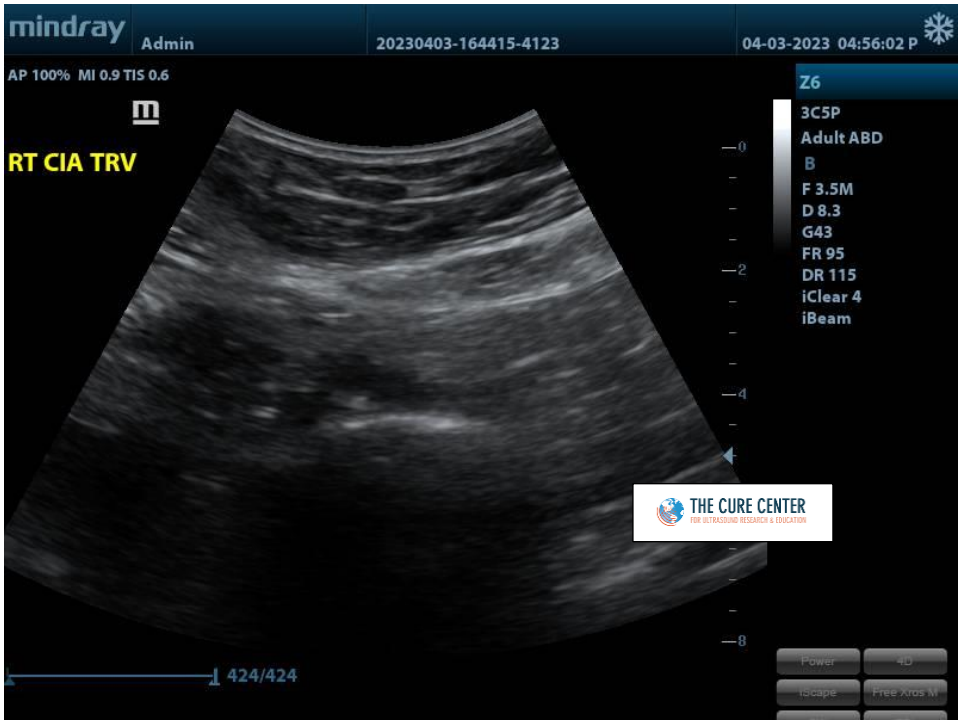

Right + Left COMMON ILIAC ARTERIES

19. TRV RCIA/ LCIA: Grayscale

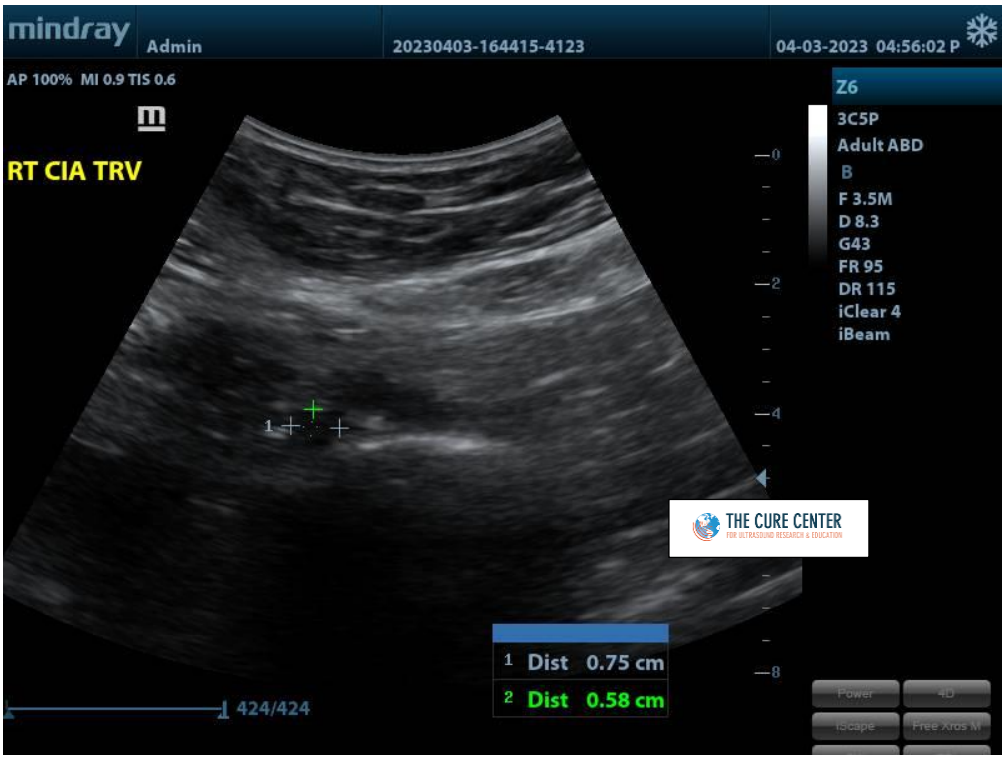

Transverse RT CIA

20. TRV RT CIA: Grayscale

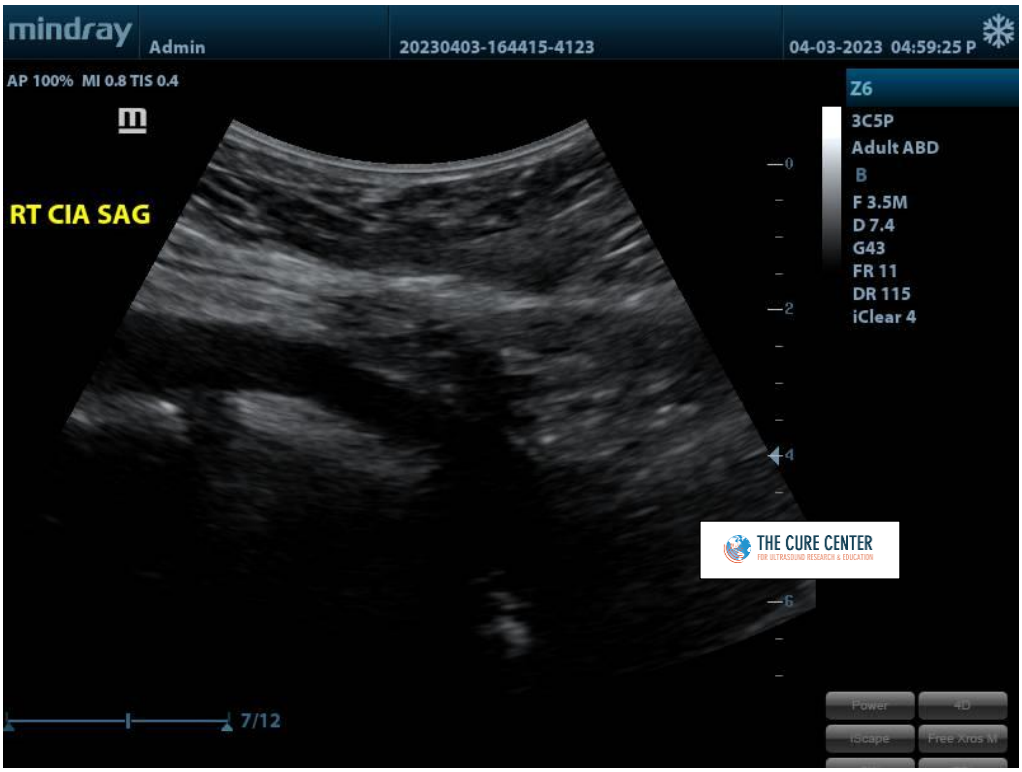

21. TRV RT CIA: W/ Measurement

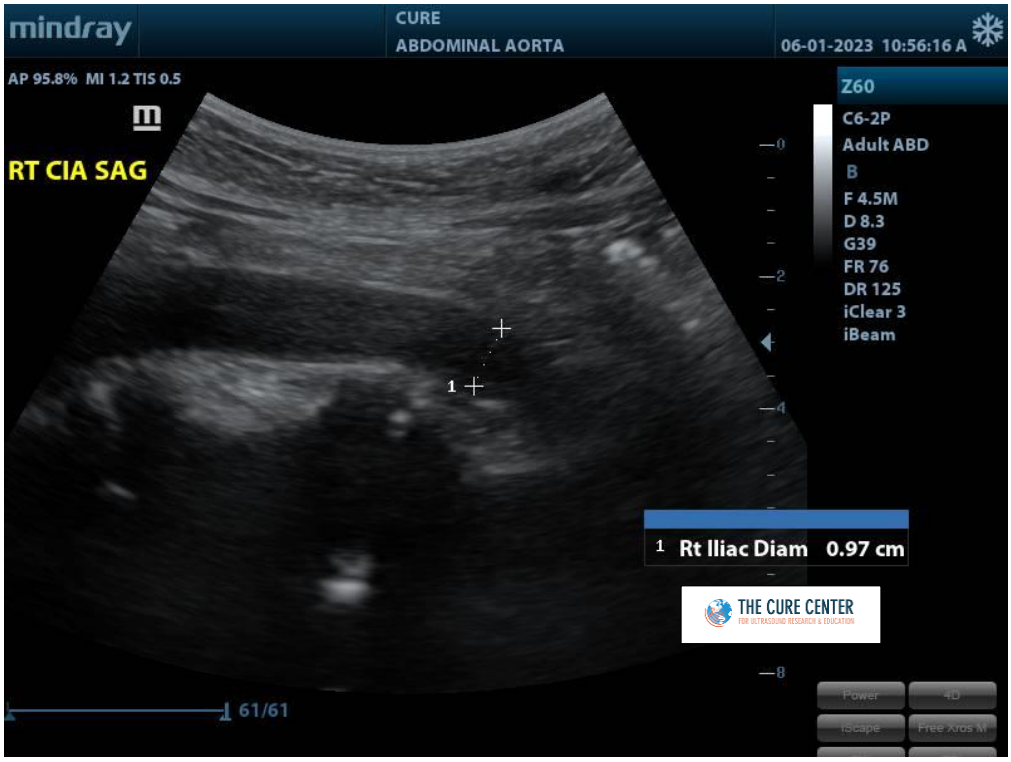

Sagittal RT CIA

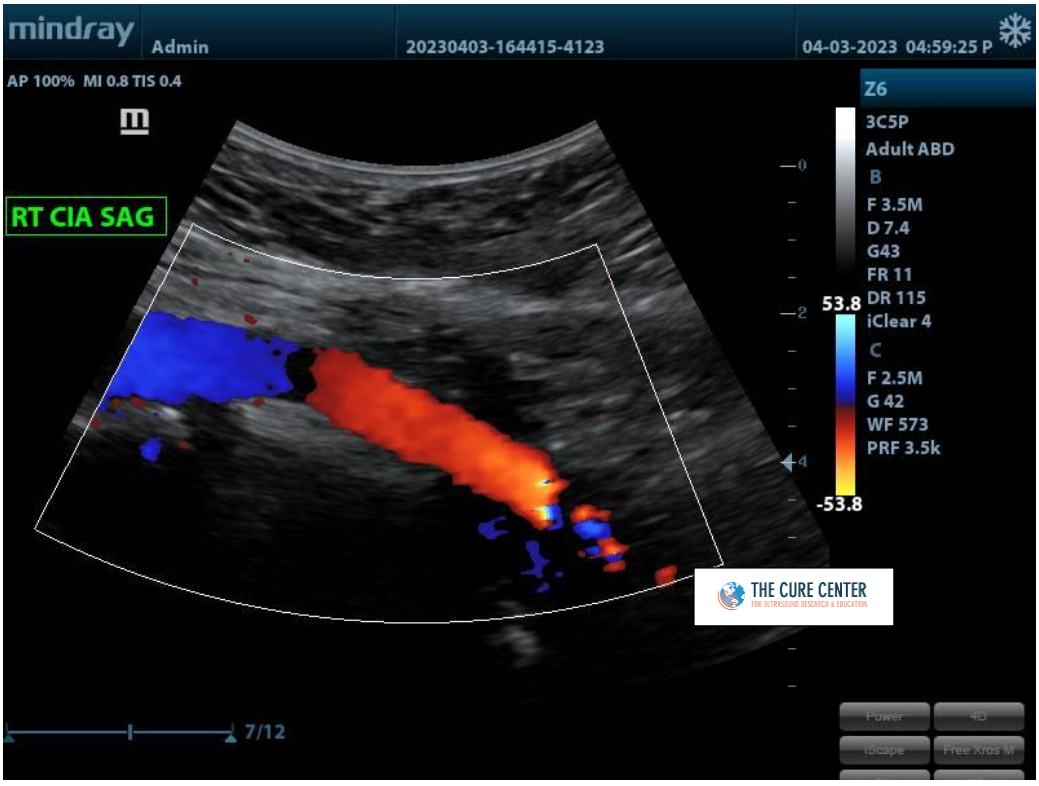

22. SAG RT CIA: Grayscale

23. SAG RT CIA: w/ Measurement

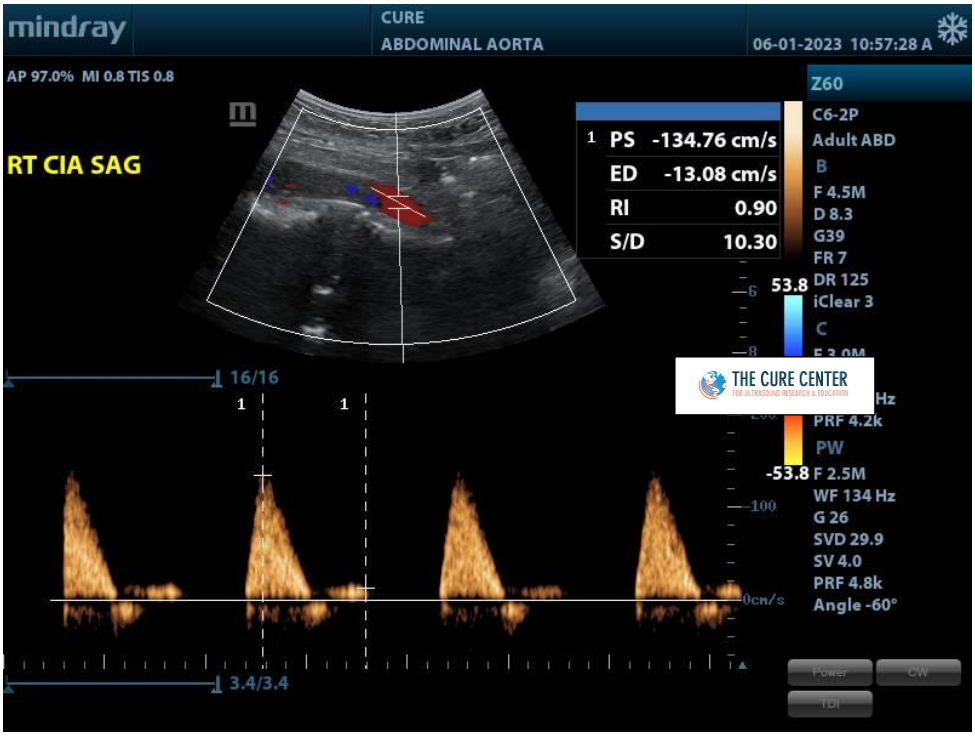

24. SAG RT CIA: w/ Color

25. SAG RT CIA: Doppler w/ PSV/ EDV Measurement

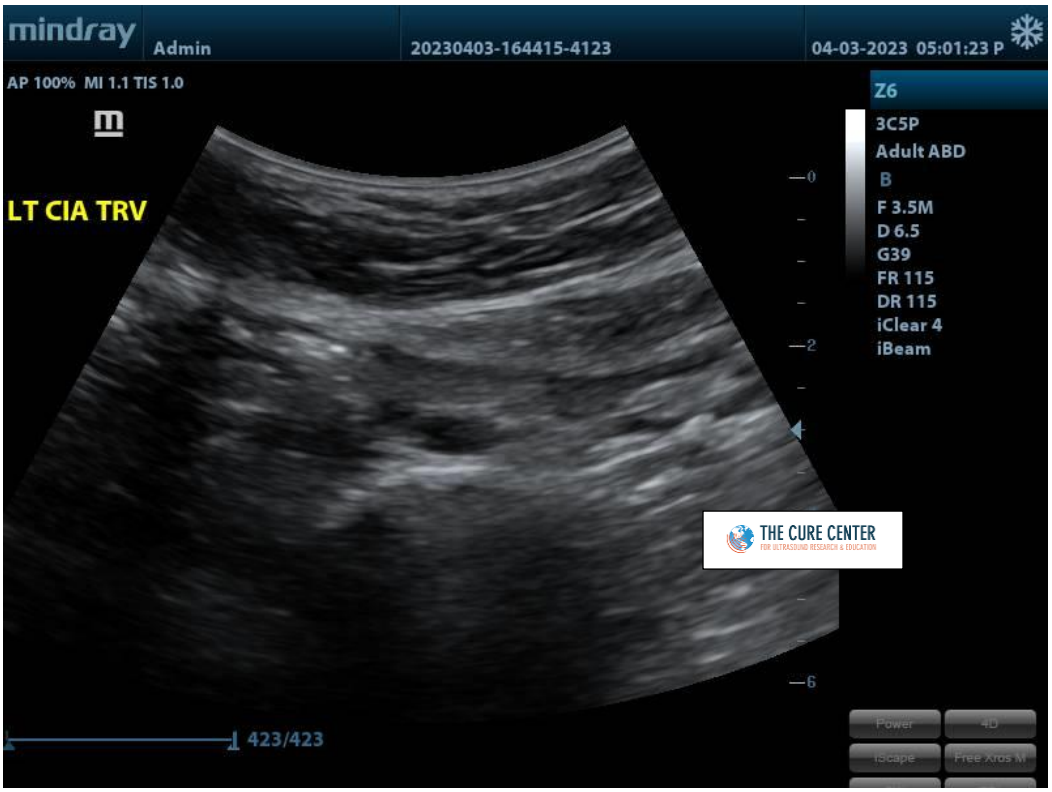

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

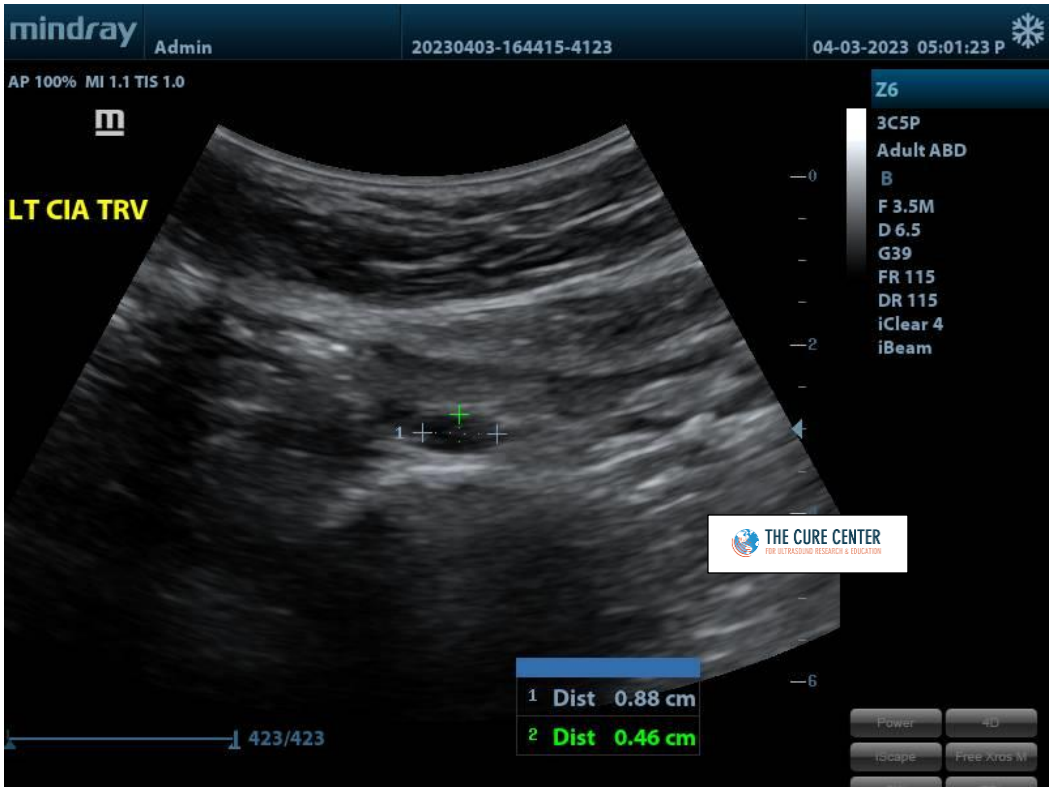

Transverse LT CIA

26. TRV LT CIA: Grayscale

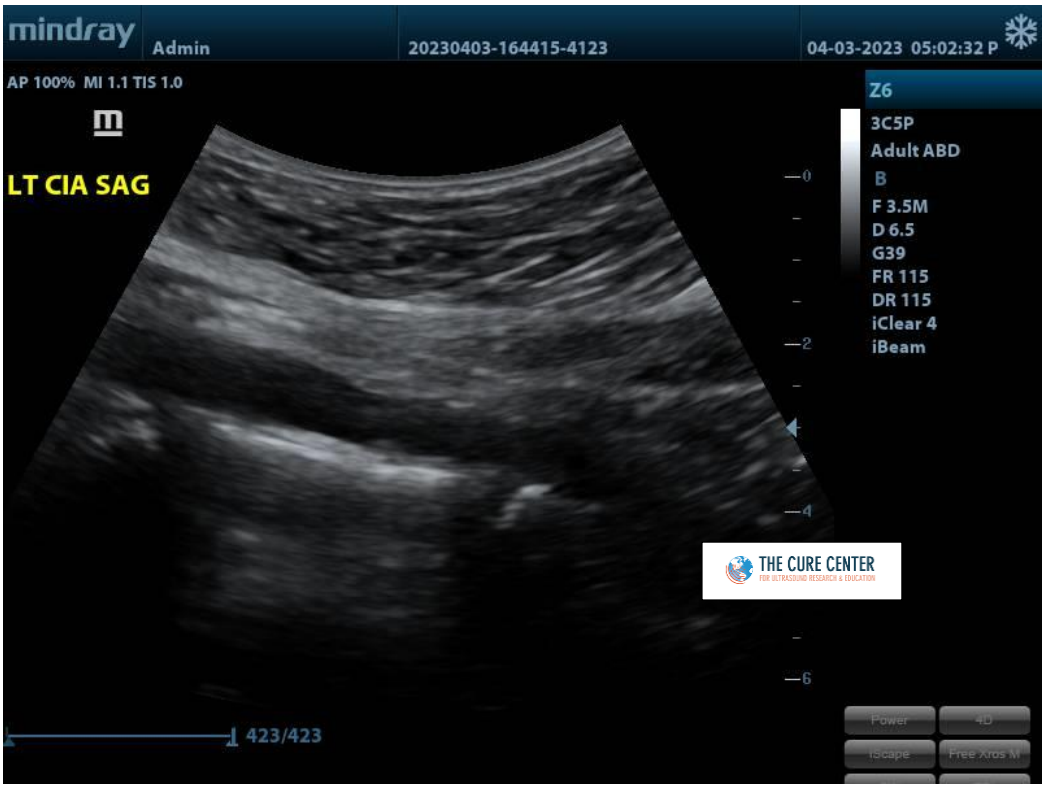

27. TRV LT CIA: w/ Measurement

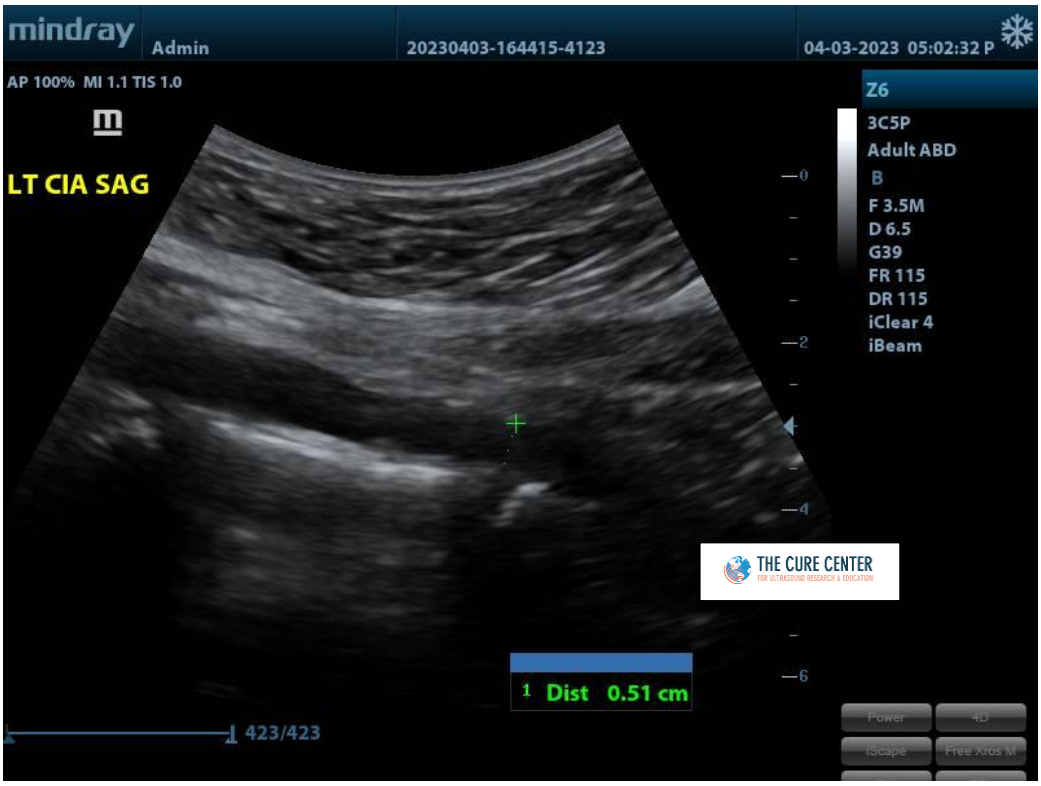

Sagittal LT CIA

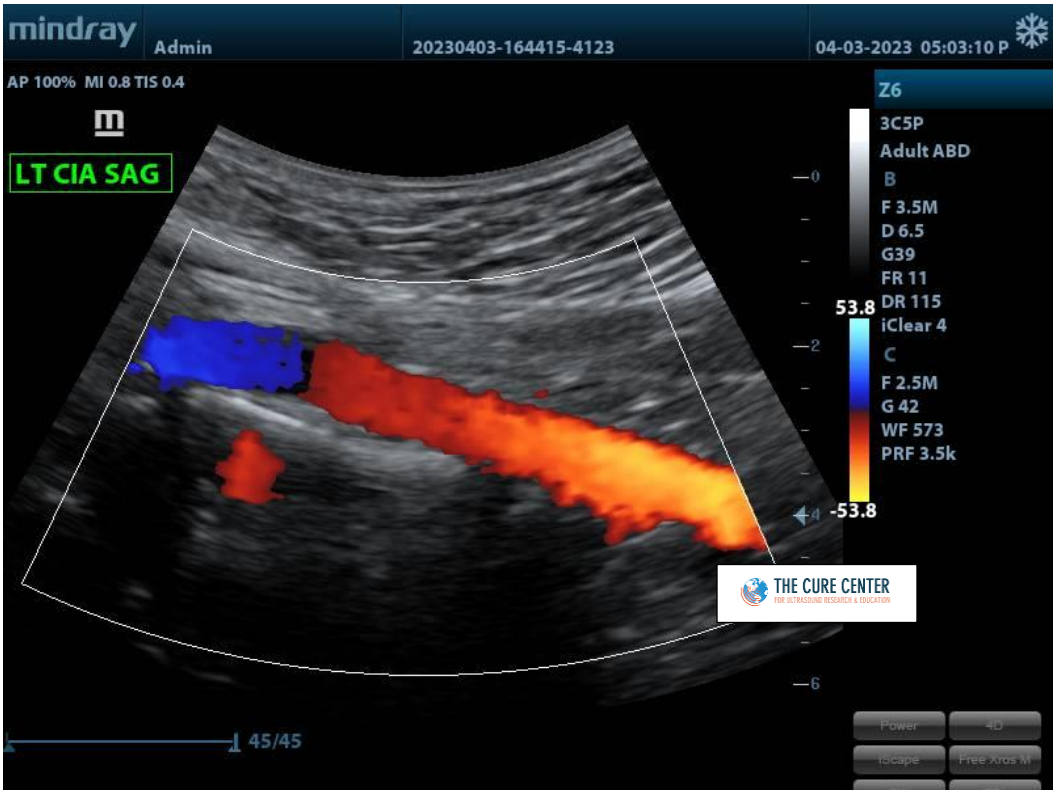

28. SAG LT CIA: Grayscale

29. SAG LT CIA: w/ Measurement

30. SAG LT CIA: w/ Color

31. SAG LT CIA: Doppler w/ PSV/ EDV Measurement

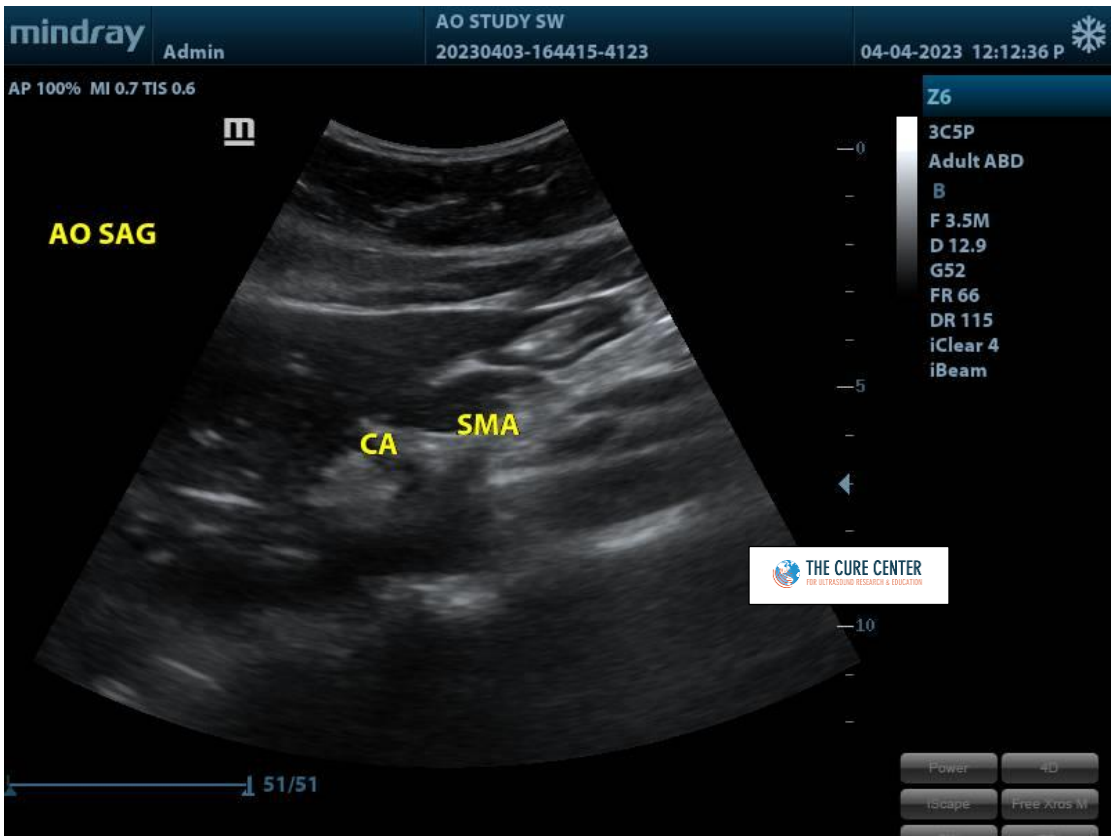

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

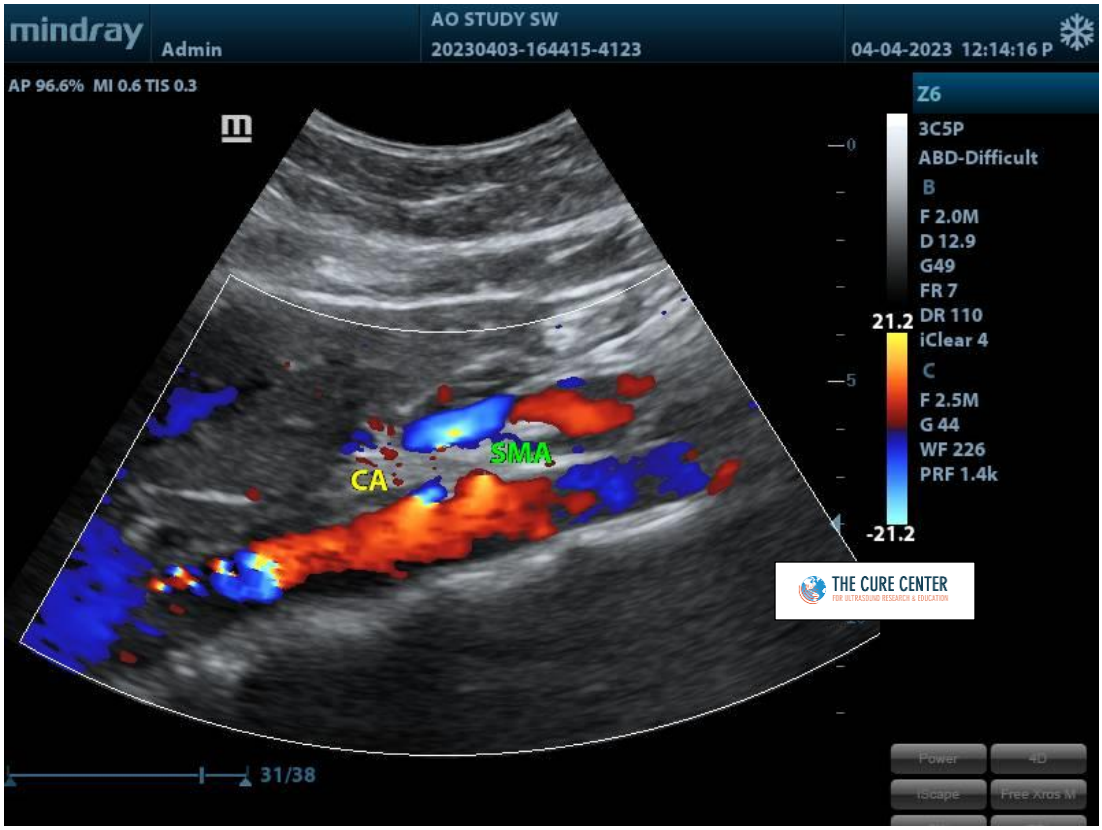

Sagittal CELIAC AXIS & SUPERIOR MESENTERIC ARTERY

1. SAG CA & SMA: Grayscale

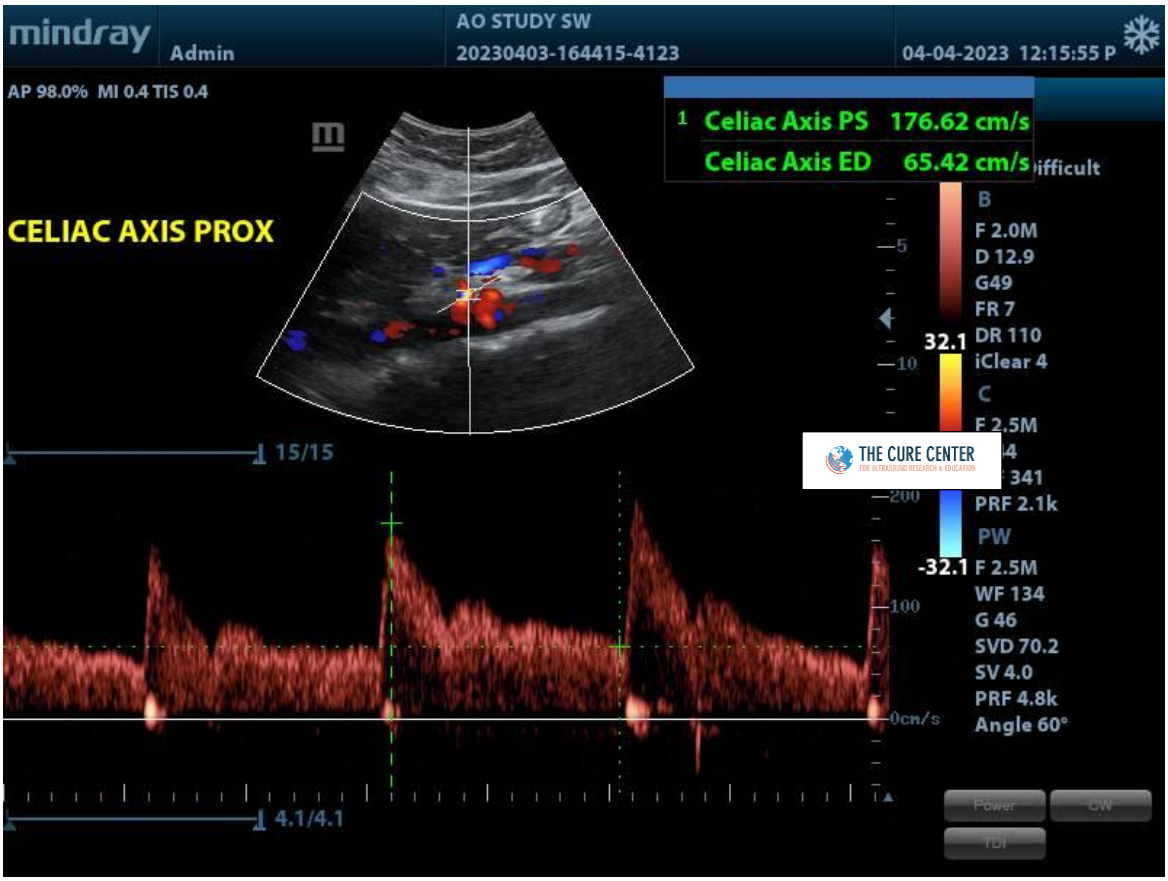

2. SAG CA & SMA: w/ Color

3. SAG CA PROXIMAL: w/ Color Doppler

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

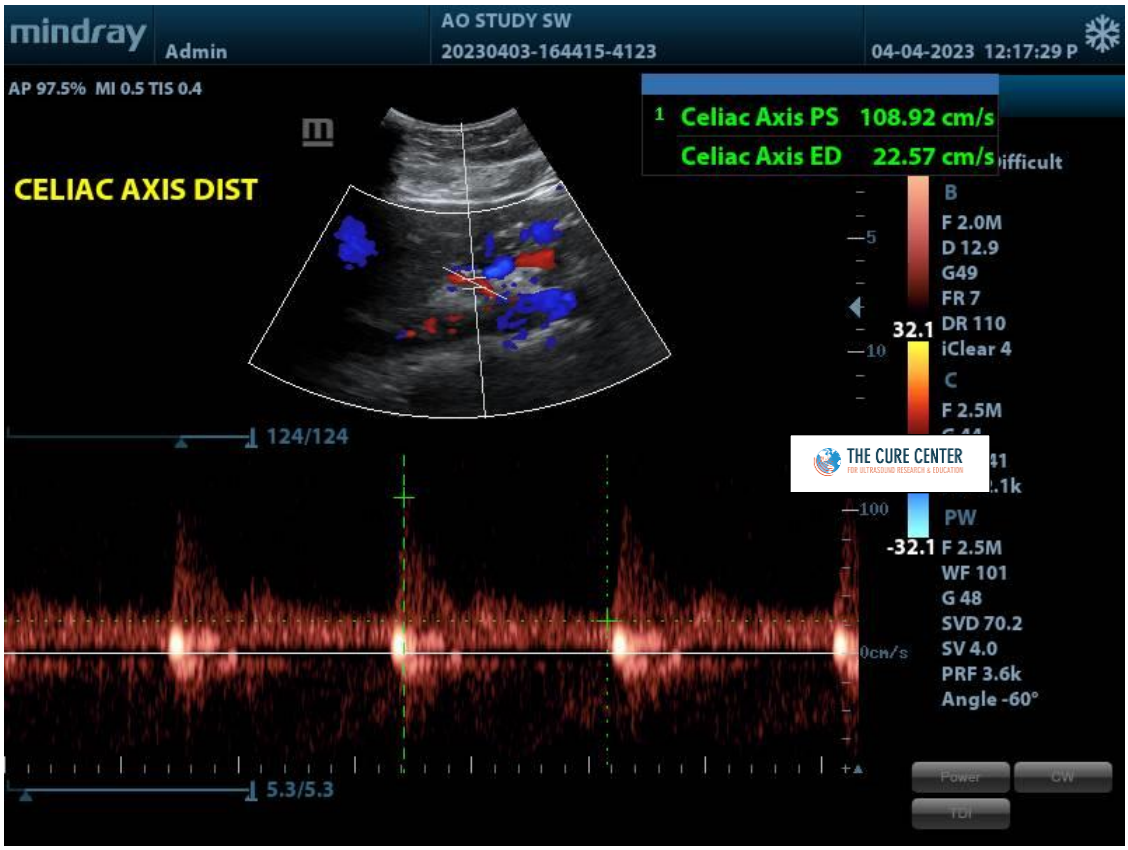

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

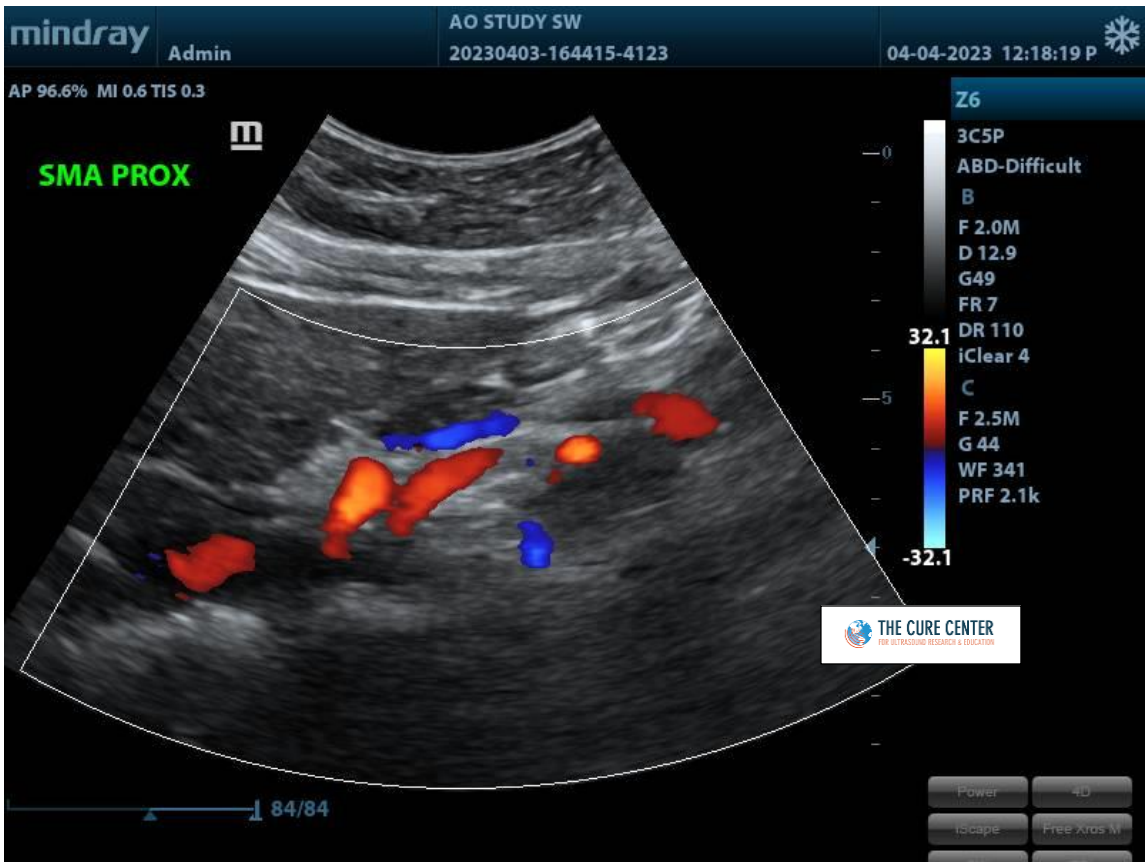

4. SAG CA DISTAL: w/ Color Doppler

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

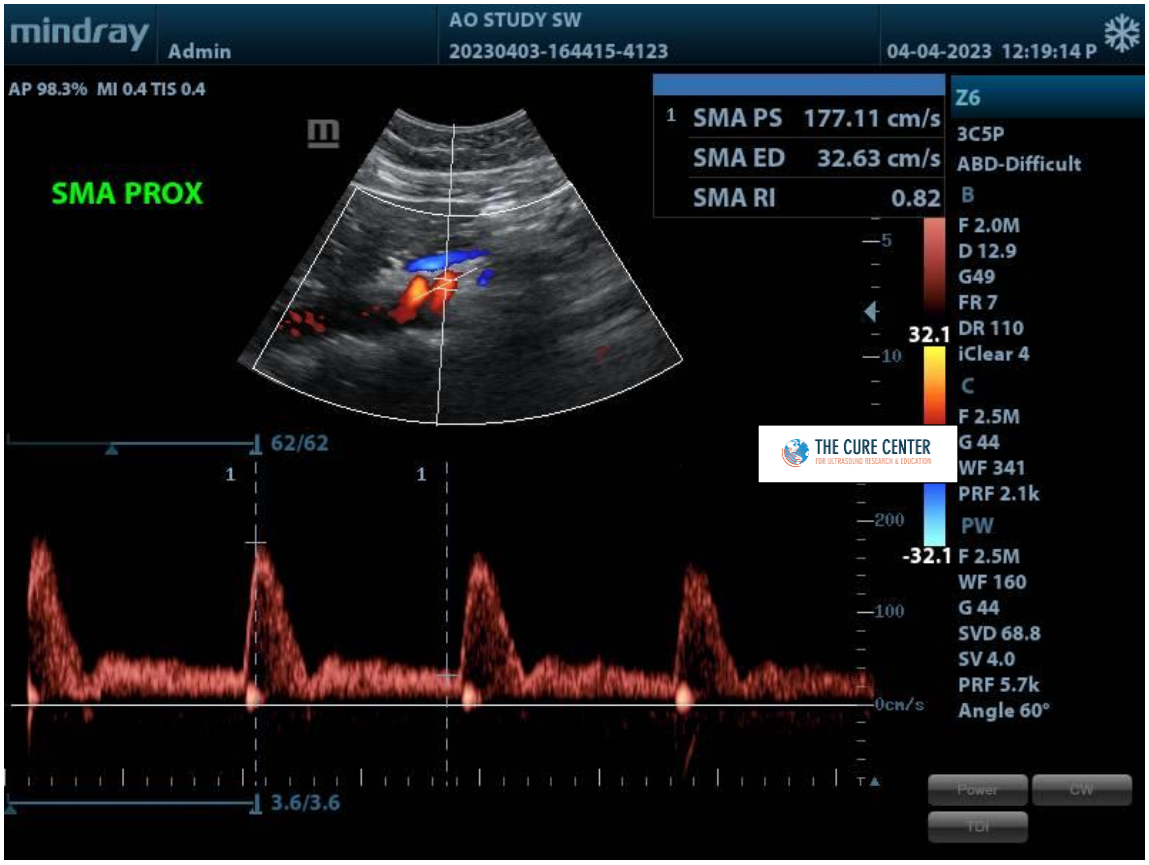

5. SAG SMA PROXIMAL: w/Color

6. SAG SMA PROXIMAL: w/ Color Doppler

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

7. SAG SMA MID: w/ Color Doppler

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

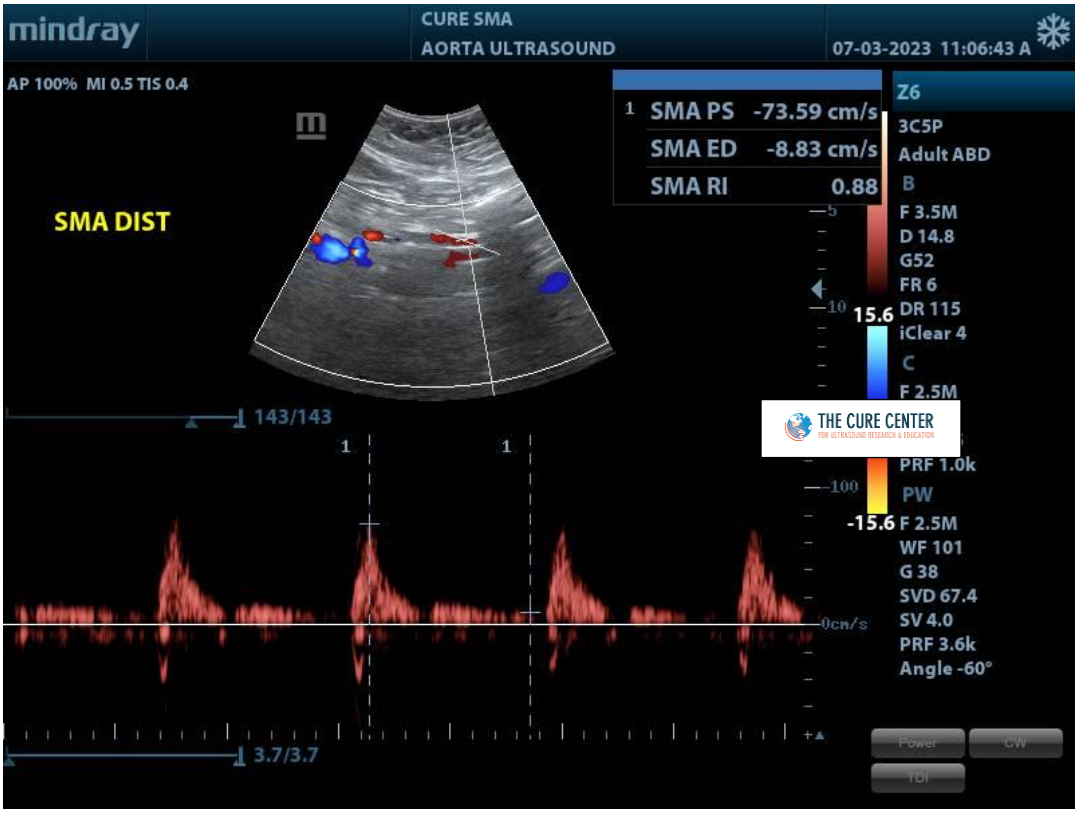

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

8. G SMA DIST: w/ Color Doppler

NOTE: Be sure to **angle** your sample gate to **60 degrees** for spectral Doppler images.

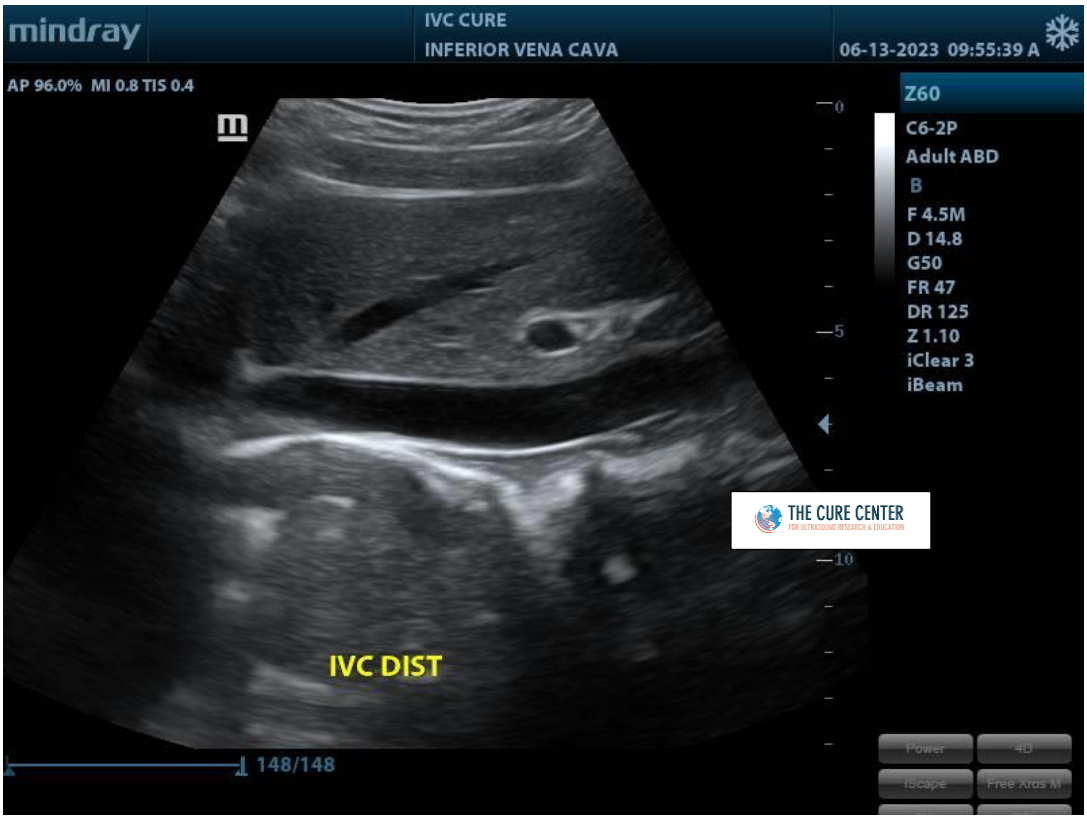

Remember to obtain measurements of the **PSV** and **EDV**, respectively.

Sagittal INFERIOR VENA CAVA

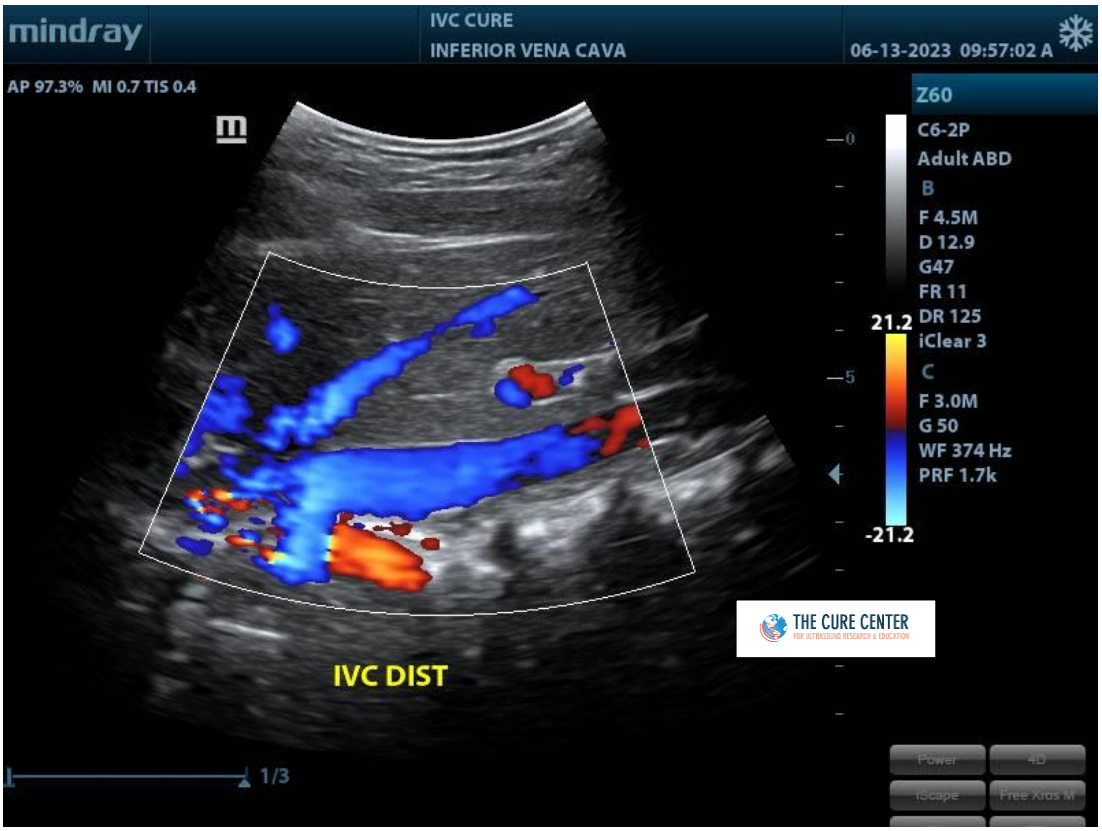

1. SAG IVC DISTAL: Grayscale

The vessel the closest to the liver is the DISTAL IVC (It empties in the heart right after this image).

2. SAG IVC DISTAL: w/ Color

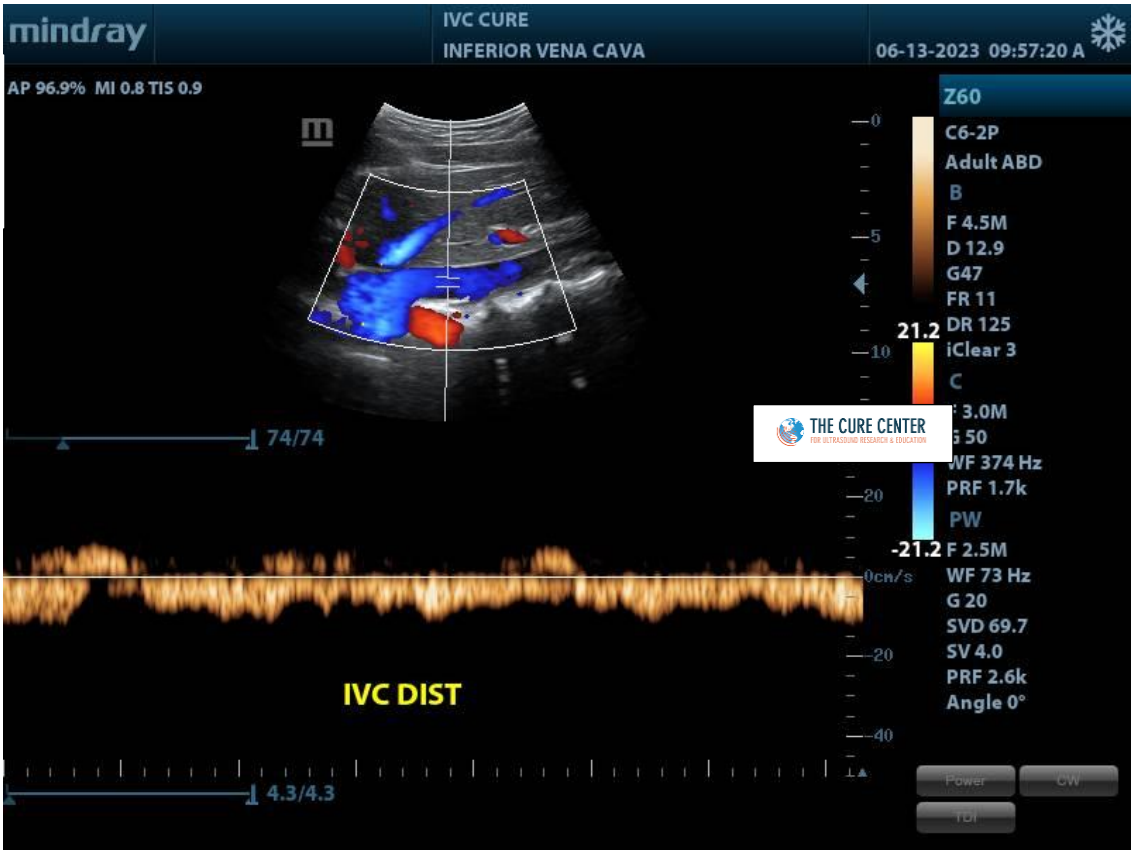

The vessel the closest to the liver is the DISTAL IVC (It empties in the heart right after this image).

3. SAG IVC DISTAL: w/ Color Doppler

NOTE: 60-degree angle is **NOT** needed to doppler the IVC.

The vessel the closest to the liver is the DISTAL IVC (It empties in the heart right after this image).

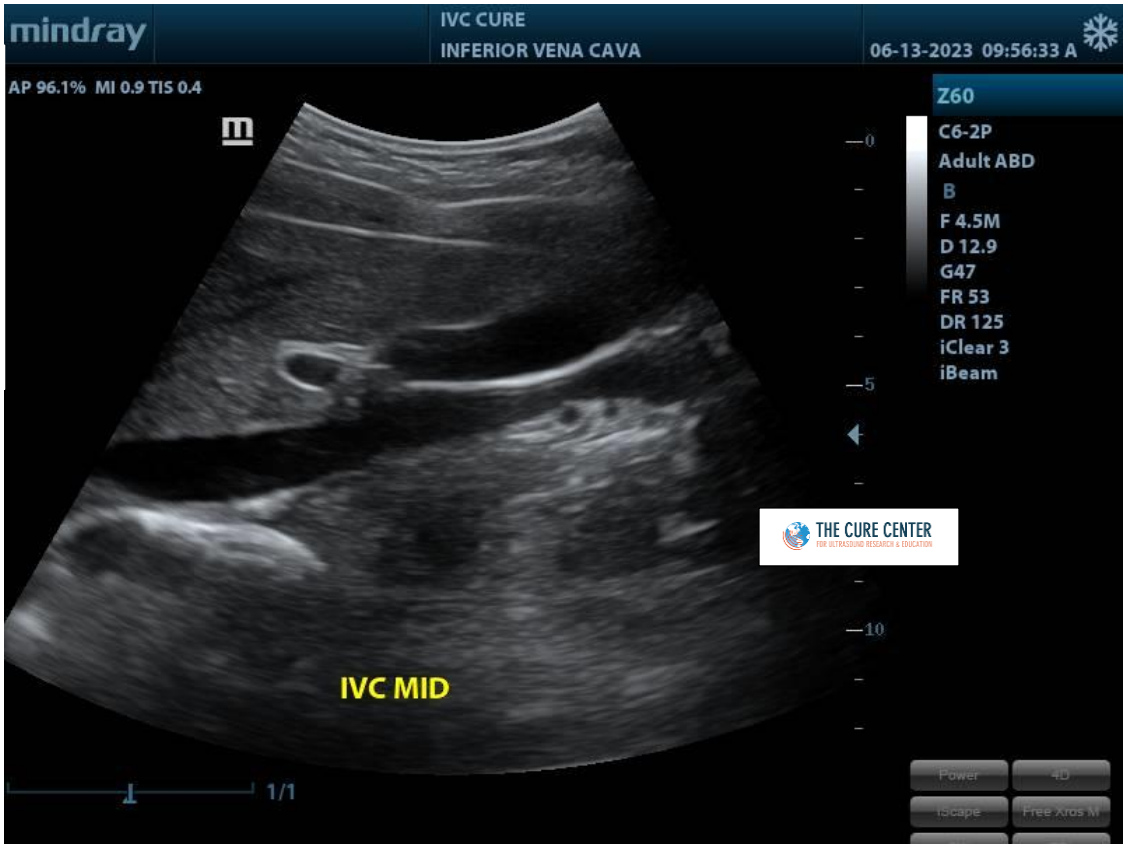

4. SAG IVC MID: Grayscale

NOTE: Remember to invert your color scale from this point on.

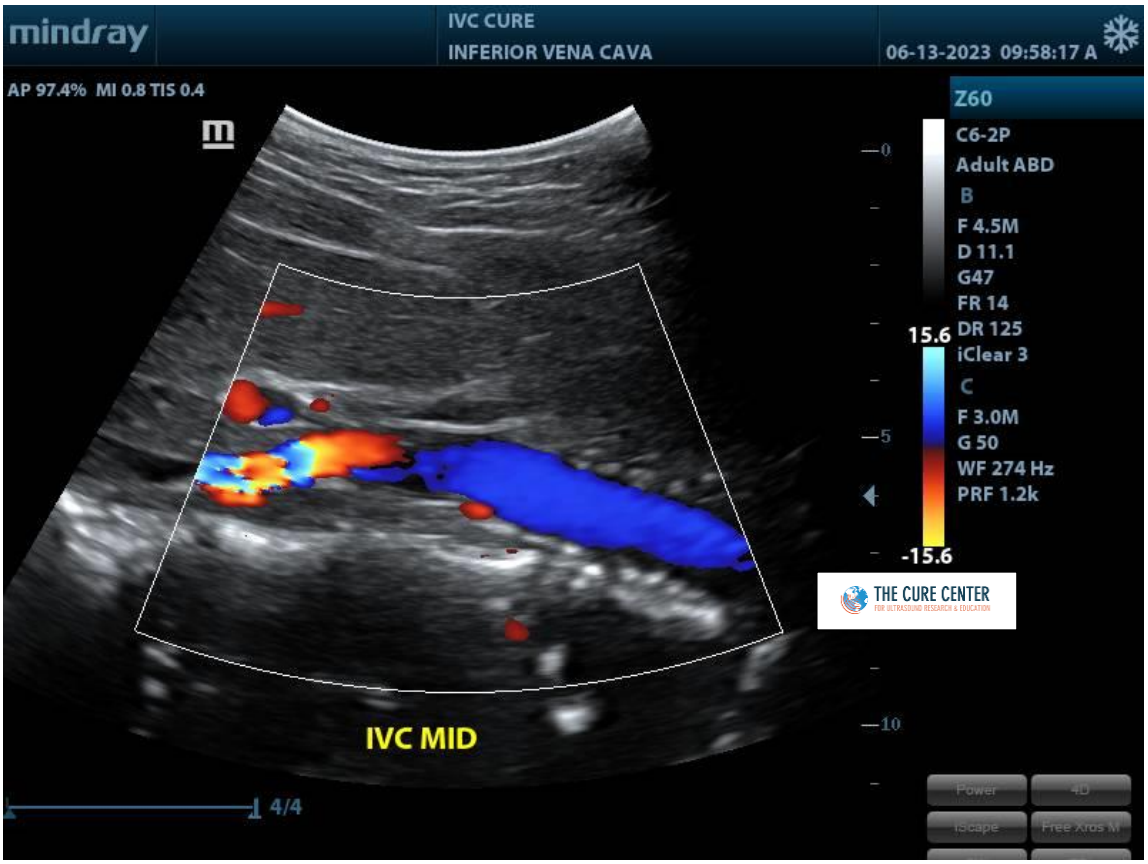

Blue should be on top and red at the bottom.

Move down in the belly, you will see the IVC MID. You should see it before you get to the belly button area.

5. SAG IVC MID: w/ Color

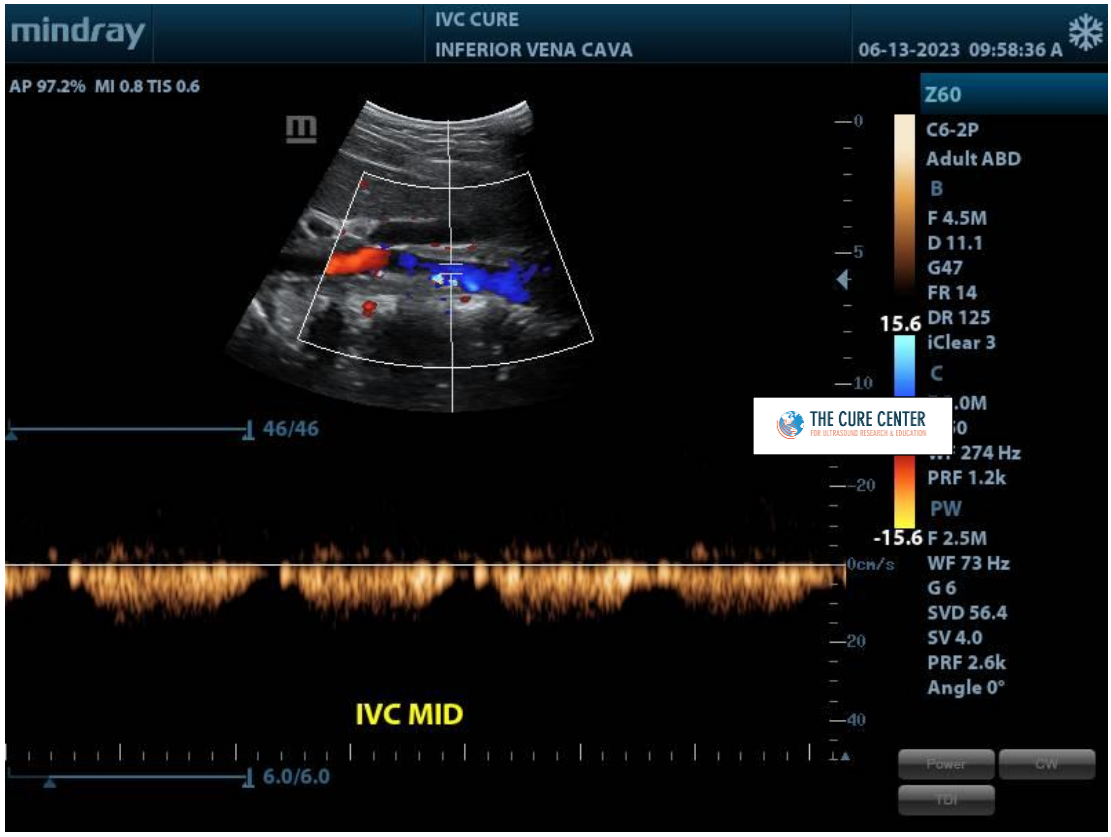

Move down in the belly, you will see the IVC MID. You should see it before you get to the belly button area.

6. SAG IVC MID: w/ Color Doppler

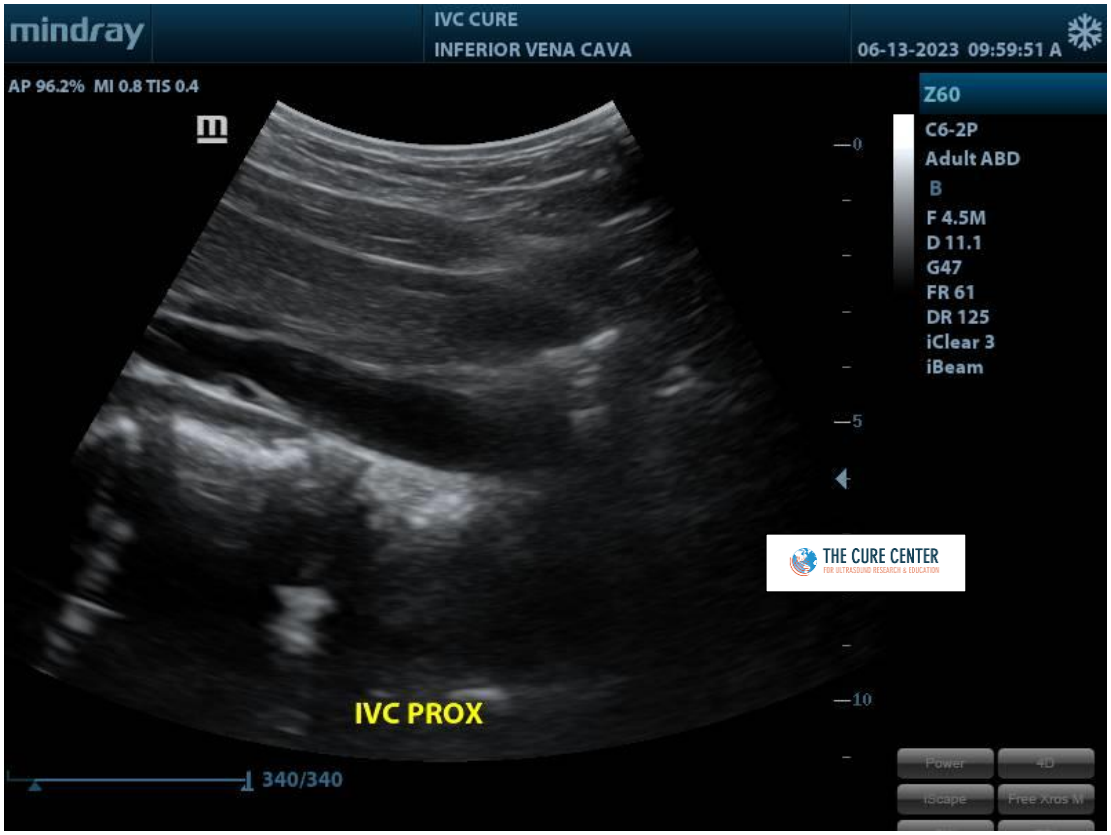

NOTE: 60-degree angle is **NOT** needed to doppler the **IVC**.

Move down in the belly, you will see the IVC MID. You should see it before you get to the belly button area.

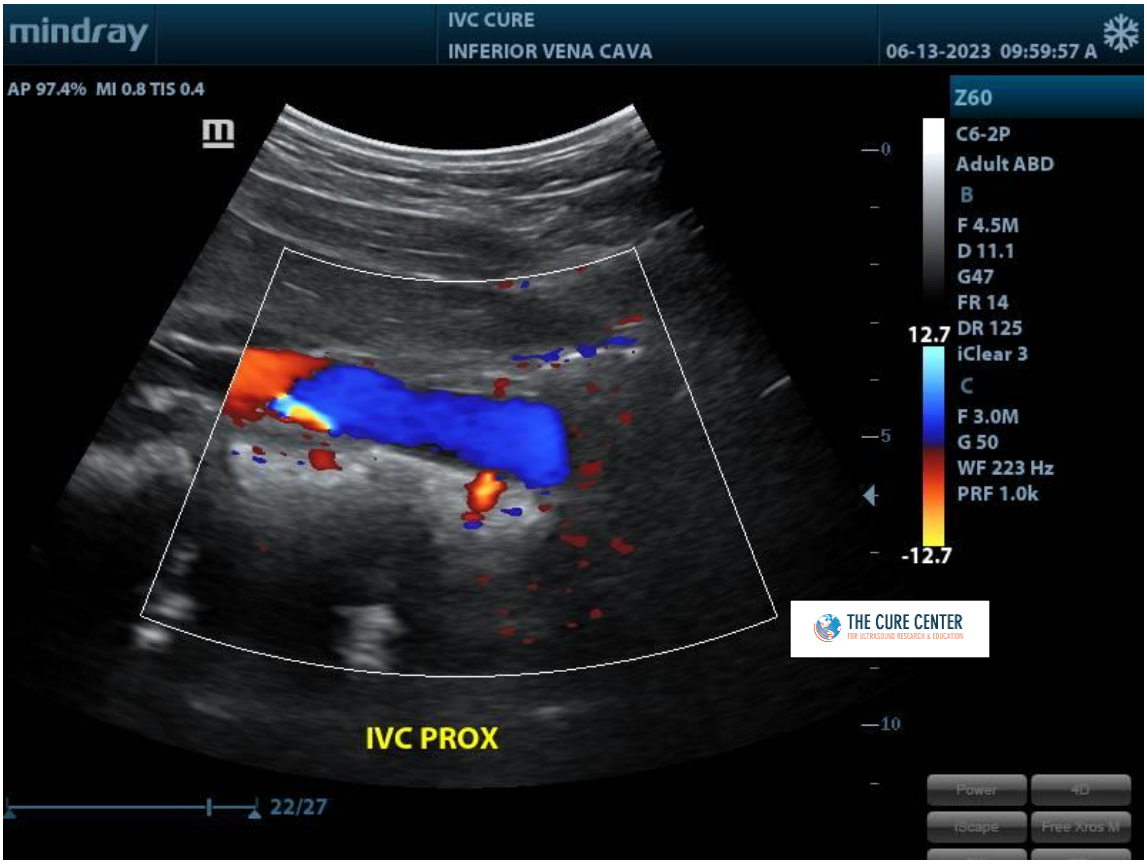

7. SAG IVC PROXIMAL: Grayscale

IVC PROX. starts from the pelvic area. It is right after the confluence of the Common Iliac Veins

8. SAG IVC PROXIMAL: w/ Color

IVC PROX. starts from the pelvic area. It is right after the confluence of the Common Iliac Veins

9. SAG IVC PROXIMAL: w/ Color Doppler

NOTE: 60-degree angle is **NOT** needed to doppler the **IVC**.

IVC PROX. starts from the pelvic area. It is right after the confluence of the Common Iliac Veins
