CLE 100 CLINICAL EXTERNSHIP SYLLABUS

COURSE CODE: CLE 100

CLINICAL EXTERNSHIP

Site Assignment/Location:

Address:

Telephone Number:

Supervising Technologist:

Start Date:

Completion Date:

Days and Times:
Monday _____
Tuesday _____
Wednesday _____
Thursday _____
Friday _____
Saturday _____

Prerequisite:
Completion of All didactic portion of the course work.

Course Contact Hours: 900
Course Length: 112.5 days
Quarter Credit Hours:
Clinical Externship: 900 Hours
Course Delivery: Residential

Pre-requisite: Completion of all academic courses (1-34)

Americans with Disabilities Act Guidelines:

Requests for accommodations should be submitted to the campus president, Program Director and Clinical Coordinator. Clinical Sites Faculty are not authorized to grant accommodations.

COURSE DESCRIPTION

Students will be placed in a clinical site for 900 clock hours. At the clinical site, students will gain experiential knowledge on the individual site's clinical protocols. Students will observe, assist and preform ultrasound studies under the direct supervision of a registered technologist.

The clinical site will expose students to real life experiences that will expand on the student's skill level and knowledge in the field. Students will be able to understand the exam the patient is having done, explore and employ the correct scanning protocols necessary to achieve successful image capture and gain the appropriate communication skills to deal with patients before and after their exam and with people that work in the facility.

Course Objectives

In your externship is to expose you to sonography exams with a registered sonographer in the filed.

- Integrate learned didactic and lab principles in the clinical setting.
- Comply with CURE and clinical affiliate department policies and procedures.
- Demonstrate professional behaviors in all matters relating to patient, family, and other healthcare members.
- Practice using ultrasound instrumentation and other equipment necessary for sonographic procedures.
- Explain proper pre-examination preparation and acquisition of pertinent patient medical information.
- Compare sonographic examination protocols and required images related to the field of study.
- Observe, initiate, and practice in diagnostic medical sonographic procedures within the plan of care and scope of responsibility.
- Perform with competency the required basic views of the anatomy (dependent on student registry pathway) using ultrasound equipment.

Required Student Resources

Textbook

Grade Point Value

Grade	Percentile Range	Points
A+	97-100	4.00
A	93-96.99	3.85
A-	90. -92.99	3.67
B+	87-89.99	3.33
B	83-86.99	3.00
B-	80-82.99	2.67
C+	77-79.99	2.33
C	73-76.99	2.00
C-	70-72.99	1.67
D+	67-69.99	1.33
D	63-66.99	1.00
D-	60-62.99	.67
F	Below 60-00	0

Methods of Evaluation

Attendance/Externship hours	30%
Participation	30%
Evaluations	40%
	100%

Teaching Strategies

Lecture/Discussion/Q & A's
Online Simulation
Laboratory Demonstration
Audiovisual
Role Play

Methods of Delivery

Off Campus: Externship/Clinical Site

OBJECTIVES

- Perform competently a full range of diagnostic medical sonographic procedures pertaining to their learning concentration and registry pathway.
- Utilize professional verbal, nonverbal, and written communication skills in patient care, procedure intervention, and professional relationships.
- Act in a professional and ethical manner and comply with professional scope of practice.
- Integrate critical thinking and problem-solving skills as expected of a healthcare professional.
- Apply clear and effective communication skills.
- Use critical thinking to solve problems.
- Collaborate to achieve a common goal.
- Demonstrate professional and ethical conduct.
- Apply quantitative reasoning and/or scientific inquiry to solve practical problems.

Professional Responsibility

Students are expected to aspire to the same high level of ethics and professionalism that is demanded of registered sonographers. This requires students to conduct themselves as

professionals and to fully engage in the learning process by preparing for and participating in all clinical activities.

Attendance Policy

- Routine, regular attendance is a requirement for this course.
- Promptness and dependability are the soft skills that garner special attention.

Attendance Rubric:

- Up to 25% will be deducted for each hour the student is reported late to the clinical site.
- Students are required to meet their professor to discuss matters of tardiness or absence.
- Students are required to notify the clinical coordinator, Program Director and/or Campus Registrar via email or direct call/voicemail to communicate an absence or lateness at the clinical site.

Externship hours attendance records are to be collected and signed by the Lead Sonographer on a weekly basis and turned over to the Clinical Coordinator and Registrar before the end of the Week. Early departures, tardiest, and no shows will be recorded. Attendance records are maintained by the Registrar as part of the student's permanent academic record.

Schedule

Students need to adhere to the clinical schedule that has been agreed upon. If there are any changes to the schedule the Clinical Coordinator must approve any change.

Clinical Hours Amendments

CURE students may request to amend the schedule provided to them by sending a formal request in writing to the Clinical Coordinator. CURE will attempt to honor every request; however, we cannot guarantee any request will be approved.

Clinical Logs

Students involved in clinical externships at CURE are required to document all their clinical hours and scans via the Clinical Log.

Each clinical log should be signed by the student's direct supervisor daily.

Clinical logs need to be submitted via email or fax on a weekly basis and sent to the Clinical Coordinator and the Campus Registrar every Monday after each completed week.

Students are required to turn in the original signed clinical logs to the Registrar's Office each month until the end of the externship assignment.

COURSE OUTLINE

Below is the course schedule which identifies course activities and the requirements for completion each week.

The course syllabus is a general plan for the externship portion of the DMS, VT, E program course; deviations may be necessary and will be announced.

Externship Activity
Weekly Objectives: The student with exposure to Abdominal scanning, Obstetrics and Gynecologic scanning, Vascular scanning, and Echocardiography scanning in a clinical setting. The clinical site appointment is dependent on the registry pathway the student needs to take based on their highest level of education and area of interest and specialization. The clinical site may be in a hospital and/or private office setting. At the end of the 6th quarter, students will meet with the Program Director and Clinical Coordinator to review clinical site assignments and expectations. Students will be instructed on professional behavior expected at the clinical site, a review of attendance expectations, and dress code. They will also receive instruction on how to keep an hour's log, a case log, case journals and the necessary evaluation forms. Each assigned clinical site determines the days and the number of hours each student will be in attendance. Each week students are expected to: • Learn how to set up for an exam room, greet the patient to bring into the room for the exam. • Review the patient questionnaire to determine why the patient is being seen and review the protocols that will be employed by the supervising technologist and the student. • Observe, assist, and preform exams. The Program Director, Clinical Coordinator and faculty of CURE will provide ongoing onsite visits to ensure each student is progressing throughout the clinical term.
