PATIENT CARE & PROFESSIONALISM

Instructor:
Telephone:
E-Mail:
Office Hours:
Mon, Wed, Fri: 12pm to 1pm & 5pm to 6pm
Tues: 9am – 5pm
Thurs: 11am – 5pm

Start Date:

Completion Date:

Days and Times:
Monday, Wednesday and Friday

Course Hours:
Morning Session:
8:00 am -10:00am &
10:10am – 12:00 pm
Afternoon Sessions:
1:00pm – 3:00pm &
3:10 pm – 5:00 pm

Class Location:
Classroom #:
Lab#:

Course Contact Hours: 24

Lecture: 16

Laboratory: 8

Course Delivery: Residential

Pre-requisite: None

Americans with Disabilities Act Guidelines: Requests for accommodations should be submitted to the campus president. Faculty are not authorized to grant accommodations.

COURSE DESCRIPTION

This is an introductory level course directed towards developing the principles, techniques, knowledge and skills of each student necessary to function as a qualified Diagnostic Medical Sonographer. It will provide a solid foundation of patient care knowledge and skills, including the introduction to the field of Diagnostic Medical Sonography and the various aspects of care implemented while the patient is under the direct care of the sonographer.

Student will learn how to obtain and interpret basic vital signs, patient evaluation and assessment including the role and the responsibilities of the sonographer during interactions with patients and other healthcare personnel.

Student will learn Infection control, patient preparation, surgical asepsis and sterile technique, including techniques involved in universal precautions of blood and body fluids and the precautions taken following a needle-stick injury.

The caring of patients with special needs will also be covered as well as special procedures under the guidance of ultrasound.

Instructional Resources

Instructional Materials

1. **Textbook of Diagnostic Sonography, 8th Edition**
   Sandra L. Hagen-Ansert, MS, RDMS, RDCS, FASE, FSDMS
   ISBN: 9780323353755, Copyright© 2018

2. **Workbook for Diagnostic Sonography, 8th Edition**
   Sandra L. Hagen-Ansert, MS, RDMS, RDCS, FASE, FSDMS
   Paperback ISBN: 9780323441834, eBook ISBN: 9780323441827, Published: 3/24/2017

3. **Essentials of Sonography and Patient Care, 4th ED,** By M. Robert De Jong, Marveen Craig.
   Publisher: Elsevier-Health Sciences Division

COURSE OBJECTIVES

Upon the successful completion of this courses the student should be able to

- Demonstrate effective communication relative to the various aspects of patient care.
- Describe the role and the responsibilities of the sonographer during interactions with patients and other healthcare personnel. while maintaining effective professional communication.
- Obtain and interpret vital signs.
- Describe methods of controlling infection in healthcare.
- Demonstrate the correct method of entering and leaving an isolation unit using strict isolation technique.
- Practice appropriate infection control technique required in the healthcare environment.
- Demonstrate correct methods of moving, assisting and positioning a patient using good body mechanics to prevent injury to the patient and self.
- Understand the difference between aseptic and sterile technique and the difference between disinfecting and sterilization.

- Understand the importance of chemical hygiene and fire safety in healthcare environment.
- Describe and understand the role and responsibilities of the sonographer in monitoring and assessing patient's equipment during an ultrasound exam.
- Pass the didactic course with a minimum passing grade of 73.

Classroom Policy

Our goal is to build a respectful learning and work environment that allows for positive communication and teamwork. To support your development, all students must abide by academic policies related to attendance, behavior and professional conduct as published in the current institutional catalog. Special attention is granted to the following items:

- There is to be no eating or drinking in any lab/computer class.
- There is to be no eating in ANY class.
- Cellular phones may only be used during class if/when advised by the instructor and required for a learning activity.
- All students must be in full uniform which includes white shoes at **ALL TIMES.**
- **There are no rescheduled exams *unless specified by the professor* with advance notification.**
- The determination to accept late homework assignments is made only by the instructor and occurs only in the event of extraordinary circumstances. If the professor does allow for an extension on assignments, there will be an automatic daily reduction by 10 points, each day beyond the original due date.
- All classes are expected to start and end at a predetermined start and end time.

Accommodations For Students With Disabilities

If you have a special learning need, please contact the Program Director. The Program Director and the Campus President will work with the student to identify reasonable accommodations/adjustments necessary to enable him or her to fully participate in the educational processes.

Professional Responsibility

Students are expected to aspire to the same high level of ethics and professionalism that is demanded of registered medical assistants. This requires students to conduct themselves as professionals and to fully engage in the learning process by preparing for and participating in all classroom, laboratory and clinical activities.

Attendance Policy

- Routine, regular class attendance is a requirement for this course.
- Promptness and dependability are the soft skills that garner special attention

Attendance Rubric:

- Up to 25% will be deducted for each hour missed or for any part thereof (5% for each 10 minutes missed).
- Students are required to meet their professor to discuss matters of tardiness or absence.

- Students are required to notify their instructor via E mail or voicemail to communicate an absence or lateness from class

Attendance is taken daily in class by the instructor and turned over to the Registrar before the end of the class day. Early departures, tardiest, and class cuts will be recorded in quarter-hour increments and a proportional grade reduction will also be applied. A period of less than 15 minutes will be counted as a quarter-hour of absence. Attendance records are maintained by the Registrar as part of the student's permanent academic record.

COURSE OUTLINE

Below is the course schedule which identifies lecture topics, assignments and other course activities and the homework required for completion each week.

ecture Topic	In-Class Activity/Lab Assignment	Homework/Out of Class
Week One Objectives: Introduction to course, class policies, and Syllabus. • Demonstrate effective communication relative to the various aspects of patient care. • Describe the role and the responsibilities of the sonographer during interactions with patients and other healthcare personnel. while maintaining effective professional communication. • Obtain and interpret vital signs. • Describe methods of controlling infection in healthcare. • Demonstrate the correct method of entering and leaving an isolation unit using strict isolation technique. • Practice appropriate infection control technique required in the healthcare environment. • Demonstrate correct methods of moving, assisting and positioning a patient using good body mechanics to prevent injury to the patient and self. • Understand the difference between aseptic and sterile technique and the difference between disinfecting and sterilization. • Understand the importance of chemical hygiene and fire safety in healthcare environment. • Describe and understand the role and responsibilities of the sonographer in monitoring and assessing patient's equipment during an ultrasound exam.		

The course syllabus is a general plan for the course; deviations may be necessary and will be announced.

DAY 1. A Sonographer's Obligations Patient-Focused Care Basic Patient Care Vital Signs	Power Point Presentation/ Lecture	**Read** Textbook: Diagnostic Sonography 8ed Sandra Hagen Chapter 2: Essentials of Patient care for the Sonographer Pages. 24-53 Chapter 2 Homework: Workbook Assignments. Exercise 1 and exercise 2
DAY 2: Patients with Tubes and Tubing	Power Point Presentation/ Lecture	**Read** Textbook: Diagnostic Sonography 8ed Sandra Hagen

Nasogastric Suction Tubes Catheters Oxygen Therapy Wounds, Drains, and Dressings Ostomies		Chapter 2: Essentials of Patient care for the Sonographer Pages. 24-53 Chapter 2 Homework Workbook Assignments Exercise 3 and Exercise 4
DAY 3. Patient Transfer Techniques Body Mechanics Moving Patients Up in Bed Assisting Patients to and from the Scanning Table Wheelchair Transfers Stretcher Transfers	Power Point Presentation/ Lecture **Final Exam and Homework**	**Read** Textbook: Diagnostic Sonography 8TH Ed. Sandra Hagen Chapter 2: Essentials of Patient care for the Sonographer Pages. 24-53
